SKEETER®

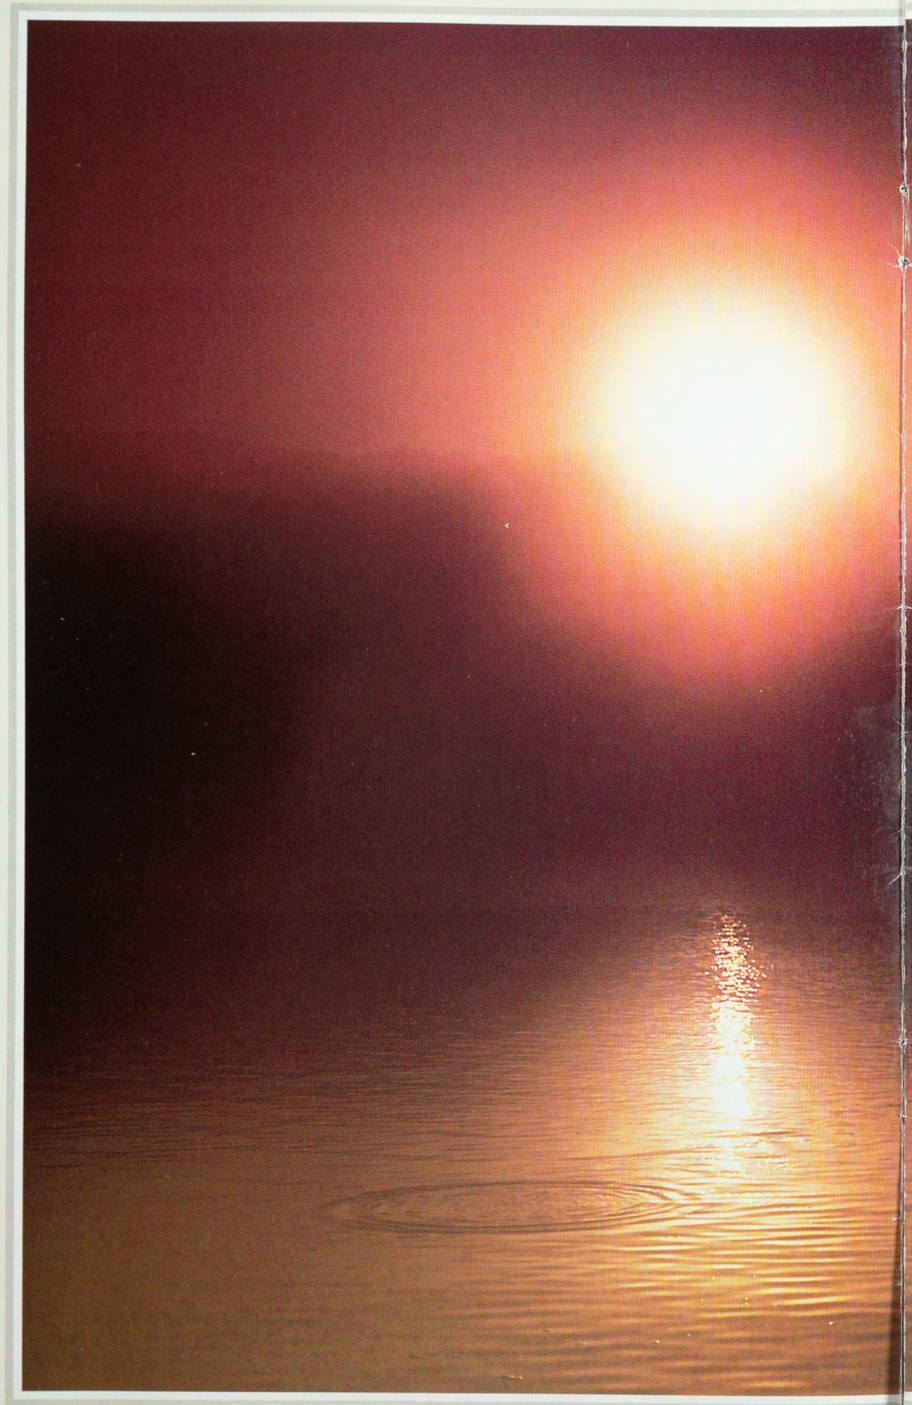
Fishing Boats

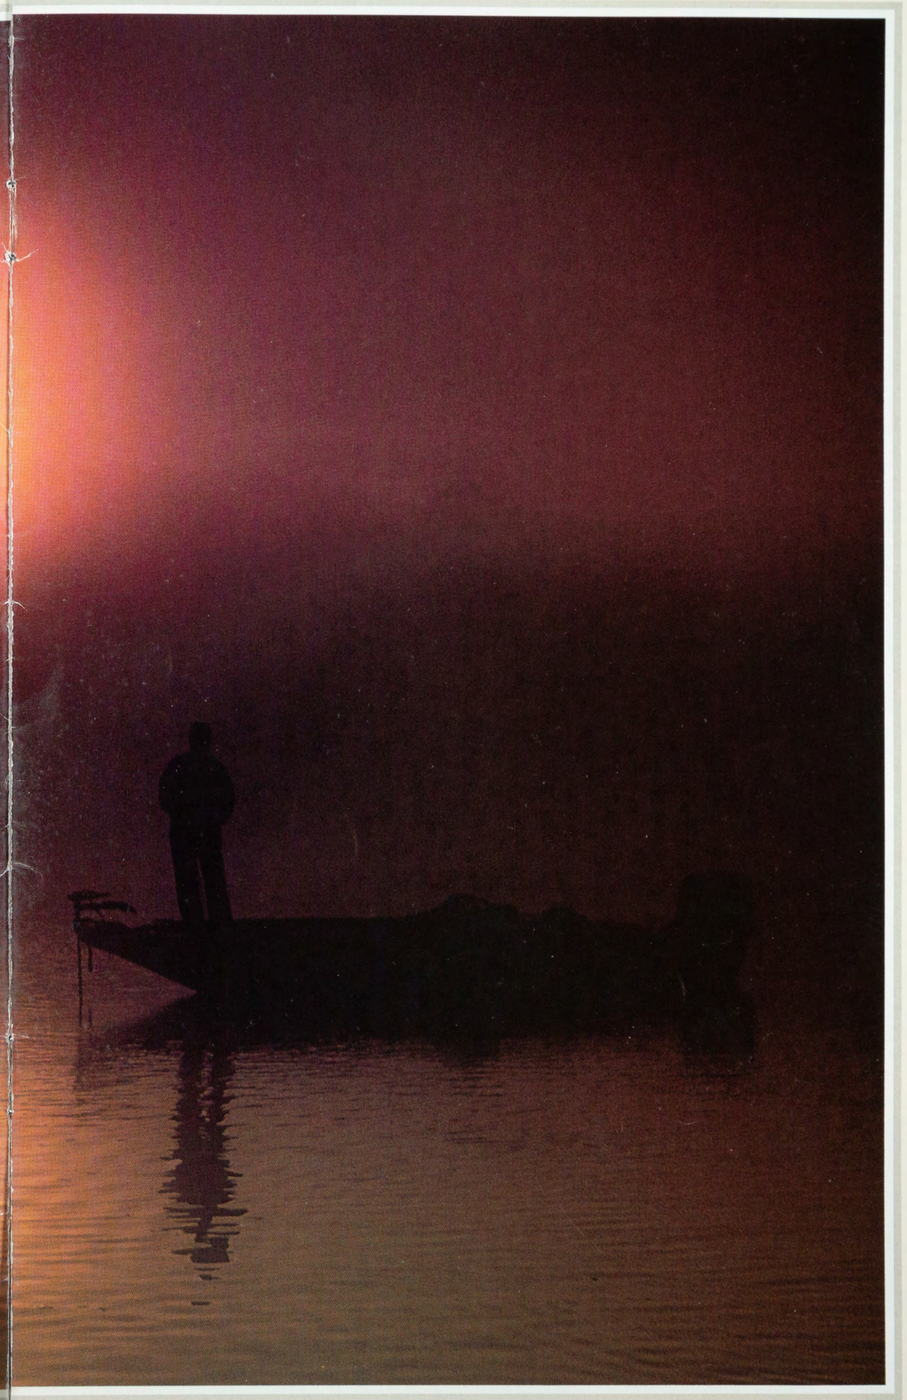
Fish To Win. Fish A Skeeter.

THINK OF IT AS RAPID TRANSIT TO THE WINNER'S CIRCLE.

Skeeter boats, like all high performance machines, are not for everyone. But if you fish hard and fish competitively, you won't find a faster way to where the fish are hitting than a Skeeter boat.

In fact, more money has been won on the B.A.S.S. tournament trail out of Skeeter boats than any other bass boat brand. Now Skeeter creativity, manufacturing know-how and technical innovation have generated a full spectrum of rugged, responsive and affordable bass and walleye fishing boats.





FAST CAN BE FRUGAL, TOO.

Even though half the fun is getting there in half the time, Skeeter set out to prove that a fast boat doesn't have to be a gas hog. The result is a line of fishing boats that combine aerodynamics and tournament experience to deliver economical, fuel-efficient performance.

BUILT FOR COMFORT AS WELL AS SPEED.

Skeeter didn't forget about comfort either. Skeeter's ergonomically-designed seats are upholstered with the highest-quality domestic marine-grade vinyls. All seating is built around high-density plastic–not wood. Decks and storage boxes are appointed with plush 22-ounce carpeting. Thermoformed steering consoles and instrument panels position all controls conveniently around you.

Skeeter Wakes Up The Water.

WHAT SEPARATES YOU FROM LOW-FLYING AIRCRAFT.

Twelve years ago, Skeeter's hand-laid *Enduro* hull was an option only available to professional fishermen. Today, it's a standard Skeeter feature.

This unique hull construction is the soul of every Skeeter boat–and one of the secrets to their speed and agility. Skeeter incorporates 12 distinct materials into its hand-laid hull to maximize the physical properties of compression, tensile, shear and deflection. It even fills all strakes and chines with a high-bond carbon fibrate for added strength and stability. The result is a rigid yet incredibly impact- and fatigue-resistant hull. Which is why your Skeeter runs straight, hard and smooth over all kinds of water.

RIDE LIKE THE WIND WHILE THE OTHERS STAY HOME.

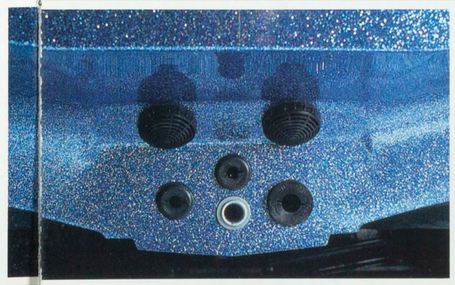
When the wind picks up, a lot of boats head for shore. But not Skeeter. Tough Skeeter hulls handle rough water without a whimper, so you can fish in virtually any weather condition. They also eliminate backwash and give you a tighter turning radius.

When the weather has the other guys grounded at the boat ramp, Skeeter keeps you on the water with a ride that's always smooth, responsive and controlled.

BUILT TO TAKE THE KICK OF 200 HORSES.

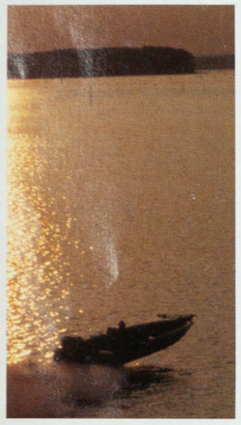
Every Skeeter also has a 13-ply transom that's 20 percent stronger than marine-grade plywood. Unlike most competitors, Skeeter's transom runs the entire beam of the boat, so your Skeeter handles even the biggest outboards.

Skeeter boats are available with Mercury and Mariner outboard packages.



Highly-Evolved Predators.

Every Skeeter boat is a competitive machine built by serious fishermen for serious fishermen. That's why every Skeeter comes with a slew of standard features that are just plain common sense to anyone who fishes to win.



WHEN THE BIG ONE HITS, SOME THINGS WILL KEEP THEIR COOL.

During a long day on the water, you can build up quite a thirst. Skeeter's built-in cooler will keep your favorite beverages cold and ready for you.

ALMOST EVERY INCH IS A FISHING PLATFORM.

From the bow traction mat to the stern, Skeeter boats feature ample deck space for clear casting and unobstructed movement. Both bass and walleye models let you easily cast from virtually any spot in the boat.

STORAGE THAT'S THOUGHT THROUGH, NOT AN AFTER THOUGHT.

Skeeter's efficient deck layout gives you plenty of storage space. All boxes are sanded, finished and carpeted. They're also totally insulated and have Skeeter's exclusive, patented Thermo-Lock™ doors to reduce condensation and temperature fluctuation. All doors are made of aircraft-quality aluminum and installed with stainless steel aircraft bolts and self-locking nuts; spring lifts keep them up when opened. And their flush mounted latches and locks are never a stumbling point, yet always easy to grasp, even on the coldest days.

ROOMY, EASY-TO-GET-AT ROD BOXES.

Every Skeeter boat comes with an extra-long and roomy rod box. Some models have two. But whatever Skeeter model you have, you'll find it's easy to stow your rods and easy to get at them. And no matter how many rods you carry, you'll find the wide open spaces of a Skeeter rod box easily accommodates them all.

LIVEWELLS THAT ARE MORE LIKE AQUARIUMS.

Skeeter's insulated livewells feature a Venturi-action pumping system for maximum aeration and oxygenation, so your catch stays as frisky as when it came on board. Livewell fittings are recessed to protect fish. Small livewell doors let in less light, which keeps fish calm. Skeeter's X Series features lighted livewells with two- or four-pump systems.

The Only Line For Fishing.

GETS YOU IN AND OUT OF THE WATER FAST, TOO.

With an optional custom trailer package, you'll never lose precious fishing time getting your Skeeter in and out of the water. And Skeeter's all-channel trailer construction makes towing easy. Skeeter's trailer packages include a wide variety of trolling motors and depth finders and other special options.

ALREADY RIGGED FOR A BIG MERC, MARINER OR YAMAHA.

Skeeter gives you the option of three of the best outboard motors in the business and the cost-savings of its factory packages. And with Skeeter's prerigged Mercury, Mariner and Yamaha packages, your Skeeter's ready for the water when it arrives at your dealer.

While many Skeeter boats are rated for larger V-6 engines, they're designed to run effectively with a broad range of horsepower.

QUICKLY BECOMING THE MOST WANTED BOAT ON THE WATER

In tournaments across the country, in virtually every type of fishing condition, Skeeter boats are meeting the demanding criteria of serious fishermen. Because Skeeter believes that action speaks louder than words.

Once you experience Skeeter performance, you'll understand why words alone can't do it justice. You'll discover Skeeter boats are fully equipped to meet your expectations for speed, responsive handling and functional design. All you have to do is add water.

X SERIES

The Skeeter X Series is the premier bass boat line on the market today. The result of 40 years of design evolution and tournament performance, the aerodynamic X Series is the perfect combination of speed and function. Models include the tournament-tested 200 versions or the all new ZX 175.

SYSTEM SERIES

Skeeter answers the needs of walleye fishermen with the System Series. It's specifically designed to handle the big lakes and rough conditions of tournament walleye fishing, and the waters where the big striped bass roam. System Walleye and System Striper boats have the speed and precise handling that have become trademarks for Skeeter boats. You can see the System 1850 and System 1850 LS at your Skeeter dealer.

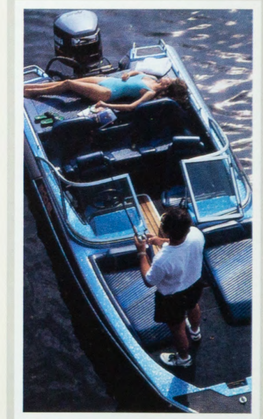
SS SERIES

The SS Series offers you all the speed, agility and craftsmanship you expect from a Skeeter in a more moderate price range. Nimble, maneuverable and fast, the SS Series is ideal for tournament competition or a casual weekend fishing trip. With four versions to choose from in the SS 140 or SS 90 models, the fun never stops.

THERE ARE EVEN SKEETERS THAT DO MORE THAN FISH.

The SL Series gives you all the punch and fishing prowess you expect from a Skeeter, with the additional characteristics of a family runabout. With the 200 SL's optional sun pad on deck, your partner can catch some rays while you go after that record catch. Lock the stowable tow bar in place, and these Skeeters switch from serious fishing machines to smooth-running ski boats.

Boats the whole family can enjoy, the SL Series has the get-up-and-go for tournament-level fishing, or taking an exhilarating spin around the lake.



How To Hook A Skeeter.

Getting your hands on a Skeeter is easy. Just call 1-800-662-3844, and we'll put you in touch with the Skeeter dealer nearest you.

Since Skeeter boats are not for everyone, there's no reason yours should look like anyone else's. That's why your local dealer has Skeeters in stock in a variety of finish, upholstery and carpet colors. Your dealer can help you special order a Skeeter, too. After all, if you're going to travel this fast, you might as well do it in style.
