

# SKEETER®

1995  
PERFORMANCE  
FISHING  
BOATS

**Eat. Sleep. Fish.**

# Skeeter. The New Generation.

**The Year - 1948.**

**The Product -** A boat built of marine plywood featuring a flat bottom, tumble-home side decks and a long needle nose, which inspired the name - Skeeter.

**The beginning of a company. The beginning of an industry.**

For nearly half-a-century, Skeeter has pioneered the development of bass boat performance, power, speed, hull design and construction, making the name "Skeeter" synonymous with fishing the world over.

Whether a first-timer or an old-timer, you will feel pride in owning the best performing bass boat on the water made by the company that invented bass boats.

The next generation of bass boats starts with every fisherman's dream - the new 300ZX and 190ZX. These new boats set the standard in performance and "fishability." Every detail defines value. High performance standards, exceptional materials and skilled craftsmanship set the stage for uncompromising value in every boat we make, including our family Fish and Ski, Deep Vee Walleye and Saltwater Bay Pro boats.

**The First Skeeter.**

In the late 1940's, an unusual new fishing boat began to appear on the lakes of East Texas and Louisiana.

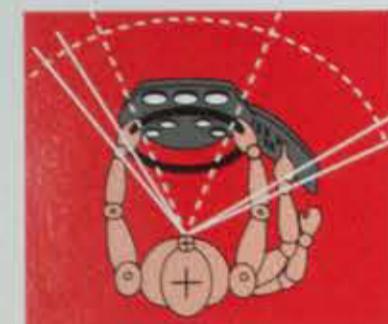

It was built of molded marine plywood and featured a long needle nose that inspired the name - Skeeter.

And how it could move over the water! Part johnboat, part powerboat, the Skeeter was not only the world's first bass boat, it was the beginning of a company, as well as an industry.

Our front bike seat is standard equipment.

If you don't test drive the incredible 300ZX, 200ZX and 190ZX you could be missing the boat! Roomy cockpit and standard tilt steering make getting in and out a snap. All instrumentation and controls are in full view.

Instruments are back-lit and switches are in comfortable reach and angled for easy reading. There's leg room to stretch out in, a foot rest for comfort and stability and a recessed area for a foot-operated throttle. The seat is angled and reinforced for maximum comfort and lumbar support.

# The New 300 ZX— A World Class Bass Boat

World Class. Many aspire to such a designation, but few actually achieve it. World Class means being the best ... the very best, and that is exactly what the new Skeeter 300ZX is all about. Raw power, maximum acceleration, smooth ride, handling, and of course, everything you ever dreamed of in a bass boat. You'll find it all and more in the new 300ZX.

And once you've reached the hottest honey-hole on the lake (before anyone else, of course), you'll be equipped with a fishing machine that has no peers. While others can only pretend, the 300ZX meets

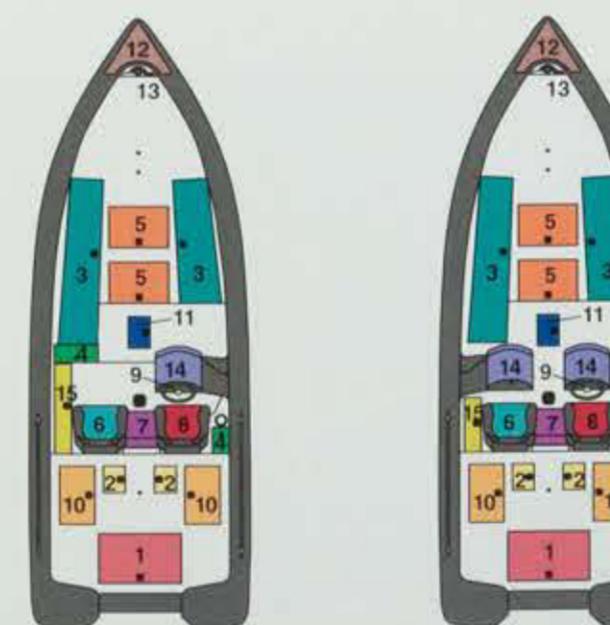

every challenge and rises to each and every occasion.

"World Class" has taken on a new meaning.

It's called *the* 300ZX.

Contoured bench seating is upholstered in tough, top-quality vinyl for years of hard wear. Flip the center seat forward to uncover a step to the rear deck.

300 ZX

Beam — 92"

Transom Height — 24"  
Max Wt. Capacity — 1484 lbs.  
Max Persons Capacity — 6/900 lbs.  
Rec. HP Range — 200-250 HP  
Weight Dry — 1600 lbs.  
Fuel Capacity — 60 gal. (Dual 30 gal. tanks)

### STANDARD FEATURES

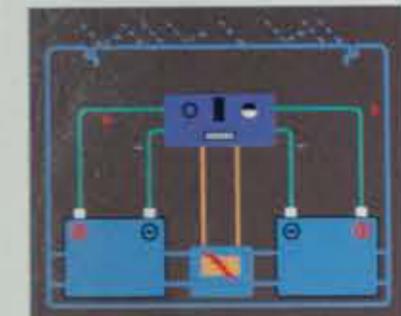

New Euro-contour seating w/flip-down center bench/1 fishing chair; 3 built-in retractable Rod Staze™ power lifts on front storage doors, rod boxes and rigging door; front bike seat w/Power Pro Pole; full instrumentation (tach, Speedo, volt, fuel, water pressure, trim gauge, horn); dual 30 gallon fuel tanks; full sequin finish/gel running surface; auto dual bilge pumps, 1-1500GPH, 1-800GPH; tilt steering; remote livewell drain controls; driver/passenger glove boxes; insulated hatch covers; carpet trim; 3 battery trays; flush-mount windshield(s); interior lighting package/rod boxes, rigging compartment, 1 bow storage compartment; deluxe 60" SS handrails; cockpit command center w/tournament livewell system and timers; designated light/paddle/accessory storage/partner rod shelf; dual built-in coolers; flush-mount engine controls & cables; 12 volt accessory outlet; direct wire 6 gauge trolling motor wiring w/terminal block; rear charge management center w/40 AMP circuit protection.

### OPTIONS

Shadow pin; dual Pro Charger; boat cover; chrome cleats; moor mate cleats (bow only); hydraulic steering; 6" or 10" jack plate.

Skeeter's exclusive, retractable Rod Staze™, located in both port and starboard gunwales, pull out and hook to the deck, securing rods for running, and retract when rods are removed.

The trolling motor management system is located inside the rigging compartment, which protects it from harsh elements. An optional on-board battery charger allows you to charge batteries by simply plugging it into a 110V outlet with an extension cord.

# 200 ZX- A Tournament Angler's Dream.

It's tournament day and you've awakened to focus on the day's fishing ahead. The conditions will test your skill and equipment. The competition will be

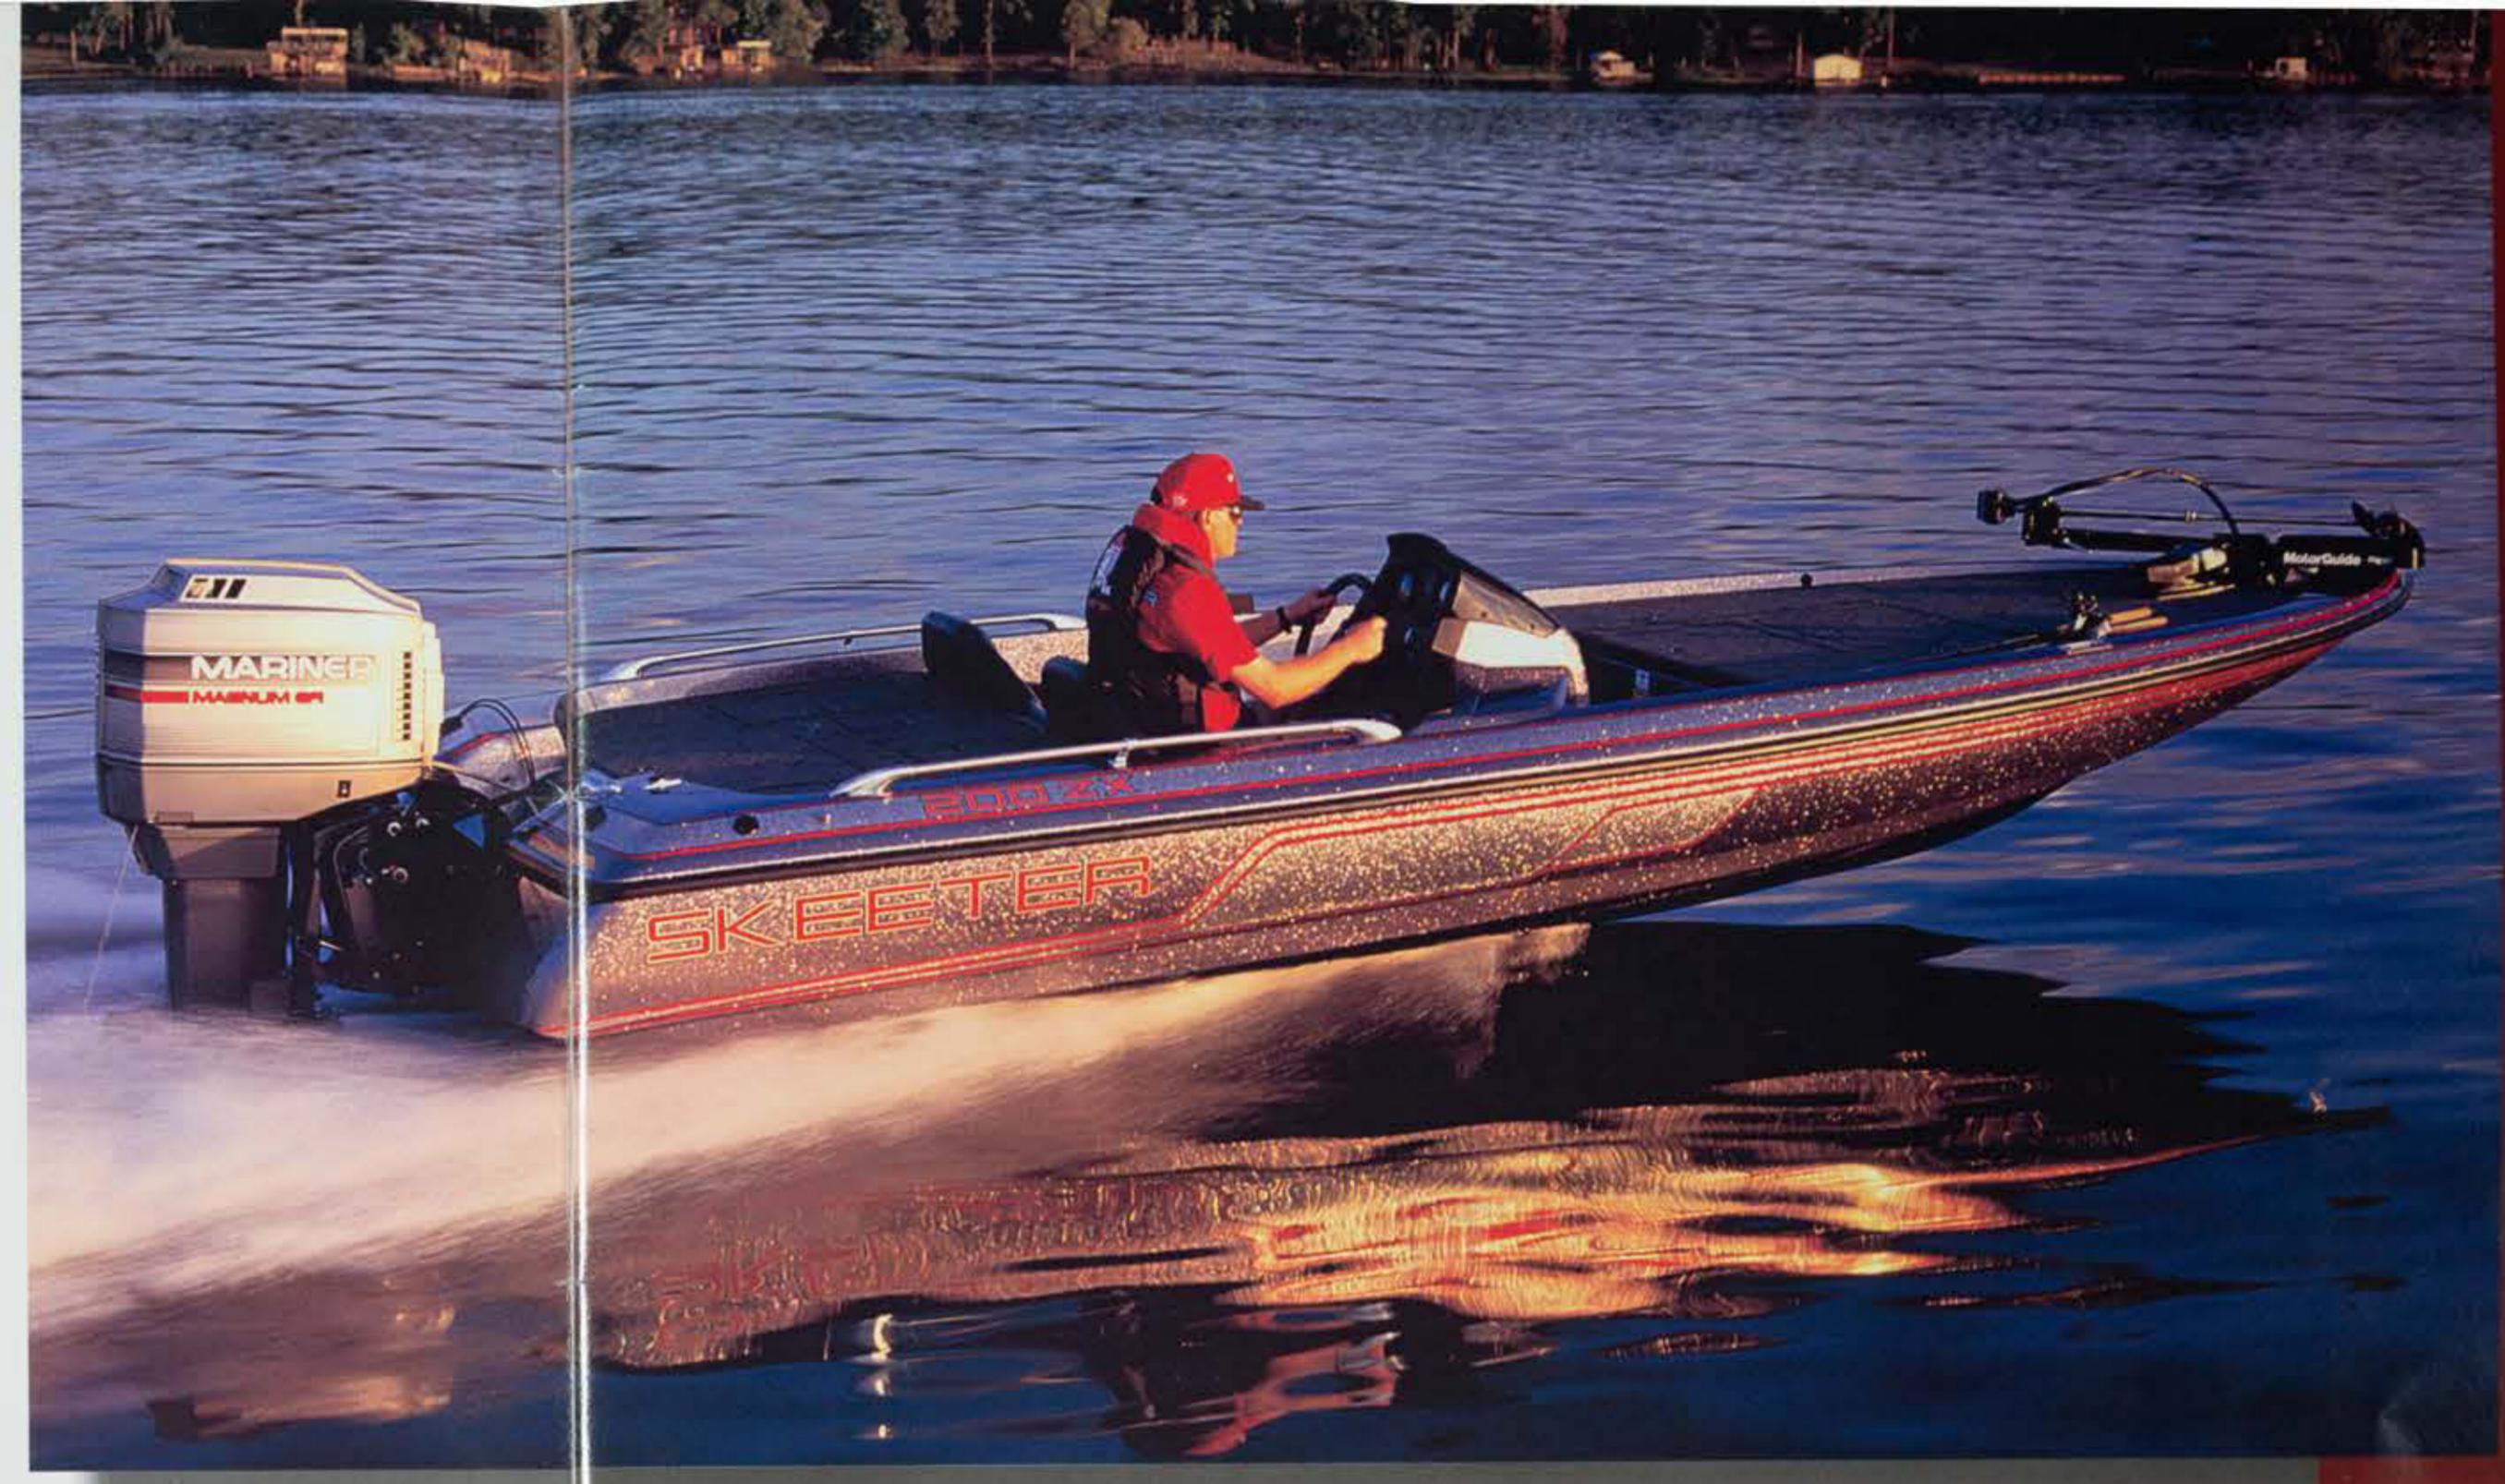

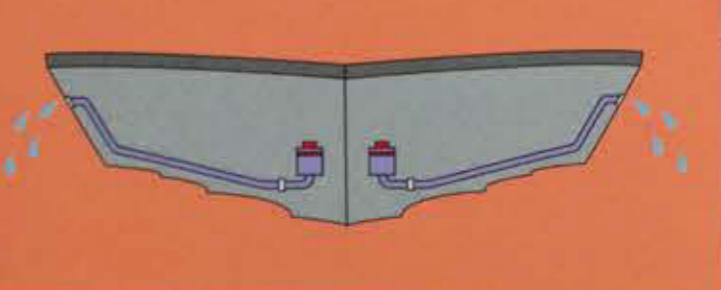

tough, and to be successful, your abilities will have to your boat on the leading edge. And "leading" is be when the into action,

200ZX explodes getting you to the hot spots first. You'll maneuver with speed, turning with no hint of skidding. Even in the worst conditions, the 200ZX will deliver a dry, stable ride... and if you need to shut the throttle down, the unique reverse draft stern keeps the water in the lake, not on your deck.

Don't just dream of the performance you'll enjoy and the respect you'll command. Experience it with the Skeeter 200ZX - a bass boat dream come true.

Bilge pumps are standard on all Skeeter models, providing a back-up water removal system. Dual auto pumps are featured on the 300ZX, 200ZX and 190ZX models.

Every Skeeter bass boat features large, insulated livewell(s), each equipped with an aerator pump and Thermo-Lock™.

Extra-large rod boxes provide maximum protection for your rods and reels in transit, and allow easy access for getting into the action fast.

# The Brand New 190 ZX -

Skeeter has done it again - this time with the brand new 190ZX. This hot new performer from Skeeter will be the talk of bass clubs and tournament

circuits far and wide. Just like its big brother, the 200ZX, the new 190ZX offers standard features

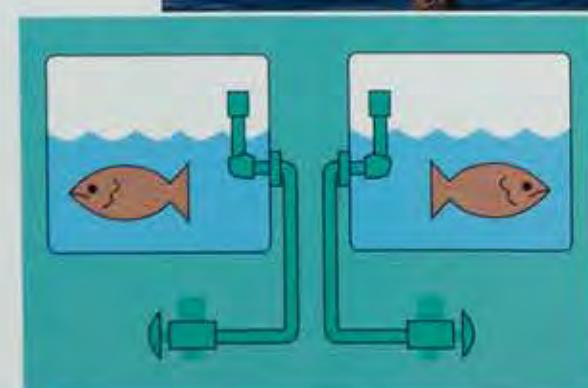

come to expect from Skeeter, such as two independently plumbed tournament-size livewells built into the rear deck at the point of the softest ride in the boat to keep your valuable catch in shape for the weigh-in; or twin, cavernous storage compartments and an easy-access rigging compartment, all designed into the rear platform. From fore to aft, top to bottom,

nobody builds it like Skeeter. With input and expertise from

decades of tourna-

ment and recrea-

tional fishing, Skeeter continues to create new and exciting performance fishing boats. With the new 190ZX, we've done it again.

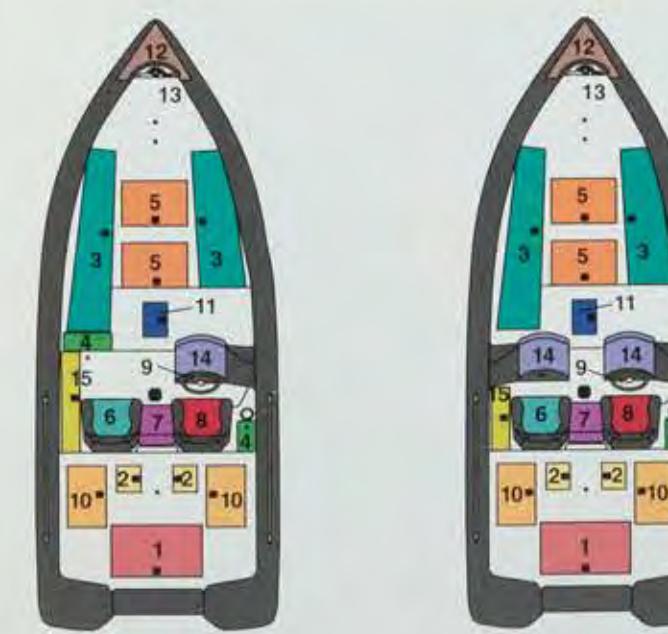

Every Skeeter livewell is furnished with its own individual pump and aeration system.

We put a grab rail right where you need it.

You'll enjoy bringing in your catch from the newly enlarged foredeck of the 150ZX.

# 150 ZX— The Choice of Champions.

Superior performance and a functional layout - tournament pros expect no less in a high-performance bass boat. The Skeeter 150ZX meets and exceeds those expectations and then some. From the company that introduced the first 150 h.p. rated

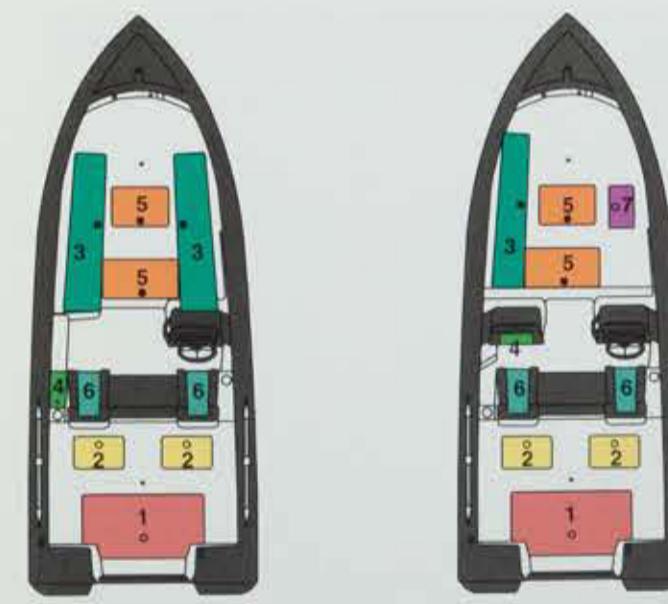

bass boat, Skeeter continues with the 150ZX, a bass boat of choice for pro and club tournament anglers alike. The 150ZX is fast, fun to drive and easy to handle. It also offers a variety of the same quality standard features and options as larger Skeeter models, making it an

incredible value at a great price.

The 150ZX, the choice you'll be glad you made.

The Skeeter patented Thermo-Lock™ insulated, corrosion-resistant aluminum doors are standard on the storage compartments and livewells of all Skeeter models.

# SS 90LX— Big Things Come in Small Packages.

Generous space in front of the SS90 console is perfect for storing your tackle box.

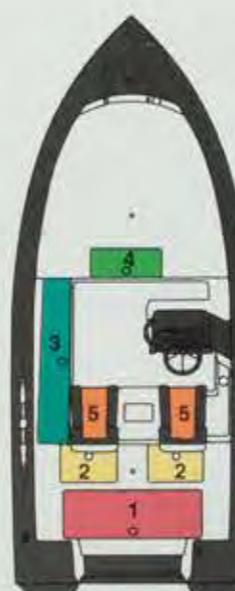

Designed for comfort and durability, the stylish Skeeter seats are upholstered in good-looking, heavy-duty marine vinyl and are moisture and corrosion resistant.

Yes, the SS90 has it all. Easily the hottest boat on the lake in its horsepower range, the SS90 puts you at the controls of a 16-foot performance bass boat with exceptional speed, fast acceleration and smooth handling. Like all Skeeter bass boats, the SS90 allows you to territory quicker, maximizing your valuable fishing time. As for standard features, the SS90 is in a league of its own. No other boat this size offers two livewells, two aerator systems, a full-length rod box, a large front casting deck or the vast storage capacity, all standard with the SS90. And when it is time to stow away the fishin' gear, add a ski-tow bar and the SS90 converts quickly into a family-fun boat that everyone can enjoy.

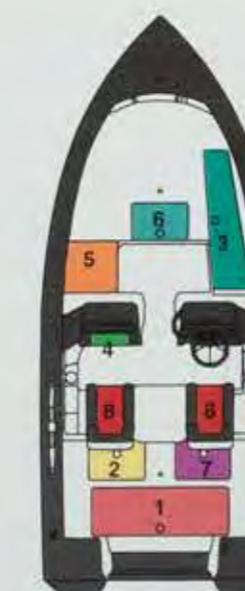

Grab your favorite rod and cast... the Skeeter oversized and carpeted rod boxes protect your rods and reels while keeping them readily accessible.

Bench seat; chrome cleats; boat cover.

The insulated, self-draining cooler is recessed into the center of the foredeck, making it convenient for all aboard.

The stainless steel ladder, boarding step and handrail are standard on the 200SL.

The easily removable, tournament-style ski tow pylon does not require supporting struts, leaving the rear deck unobstructed for sunbathing. (Sun pad optional.)

# 200 SL— Decisions, Decisions.

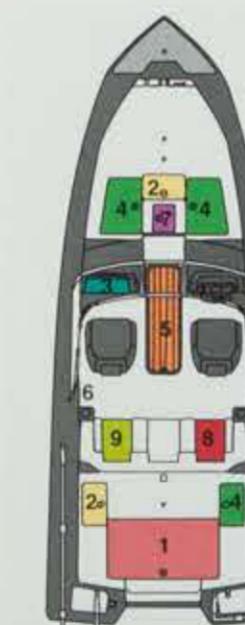

When you can't choose between a performance bass boat or a family ski boat, Skeeter's SL Fish & Ski line of boats will deliver it all. Designed to give you year-round all-weather fun on the water, whether pulling up skiers or pulling in the fish, you can do it all with the Skeeter SL series. The top of the line 200SL offers as standard the equipment you'll need for a great day of skiing: ski storage, swim ladder, ski tow pylon, plenty of seating and deck room for your friends, plus an

AM/FM radio with cassette player to make the good times roll. With all of this carefully designed into a strong and highly efficient hull, the 200SL offers the acceleration you want along with the smooth, safe ride you need. From serious fishing in the morning

to casual cruising in the afternoon, the 200SL offers versatility that everyone can enjoy.

The 200SL is a formidable fishing machine with casting deck, front bike seat and rear fishing chair, bow instrument/control panel and tackle and rod storage.

Skeeter offers top-of-the-line accessories for all of its products.

# What Makes Skeeter Special?

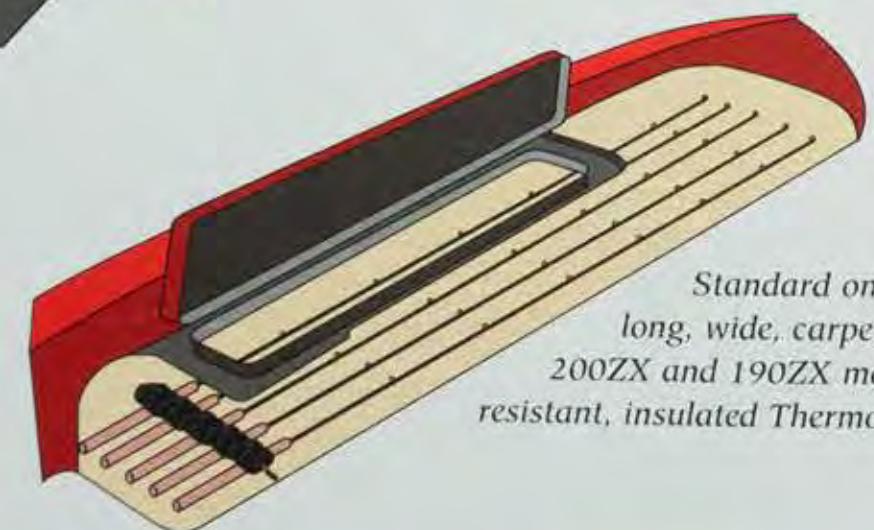

Just being trailered, your Skeeter turns heads. On the lake, it gets better: the stylish looks, the acceleration, the way a Skeeter sets up on top of choppy water for a smooth, dry ride even at full throttle, the competitive excitement of being first to the hot spots, the pleasure in a boat designed with the input of years of tournament and recreational fishing. Finally, the priceless contentment in owning the best, the satisfaction in getting value: these are the lasting rewards of owning a *Skeeter*.

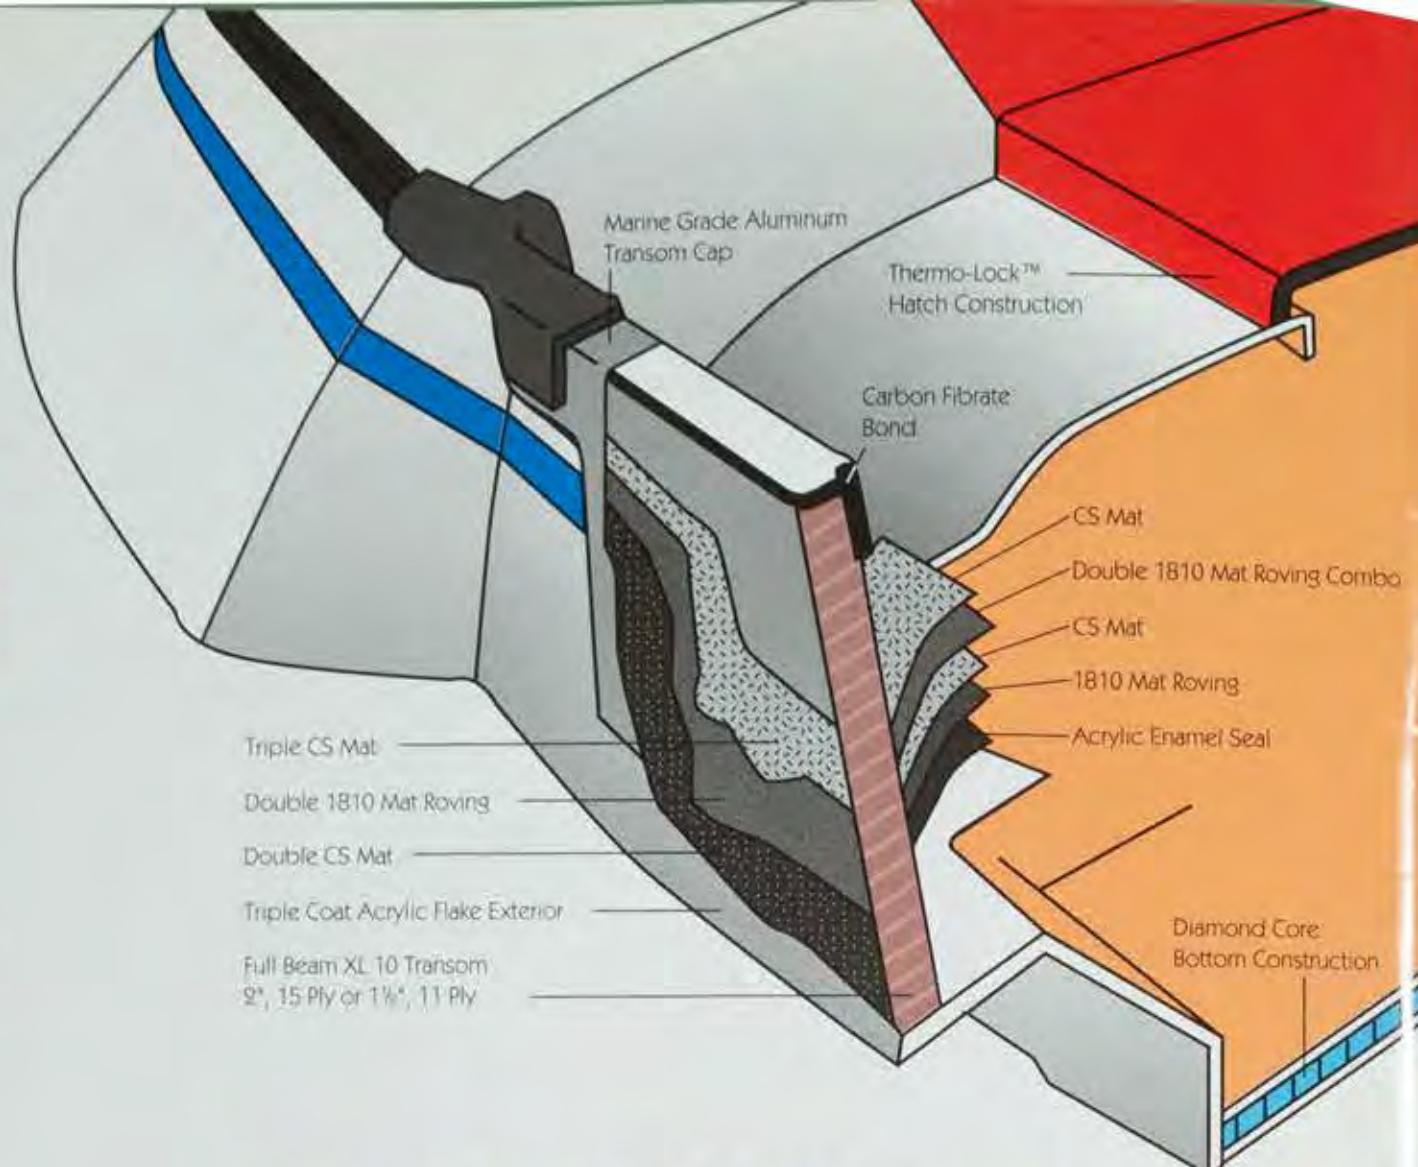

Steep transom angle produces greater upward thrust on take-off for quicker planing.

Skeeter casting decks are designed high to enhance flippin' and pitchin'.

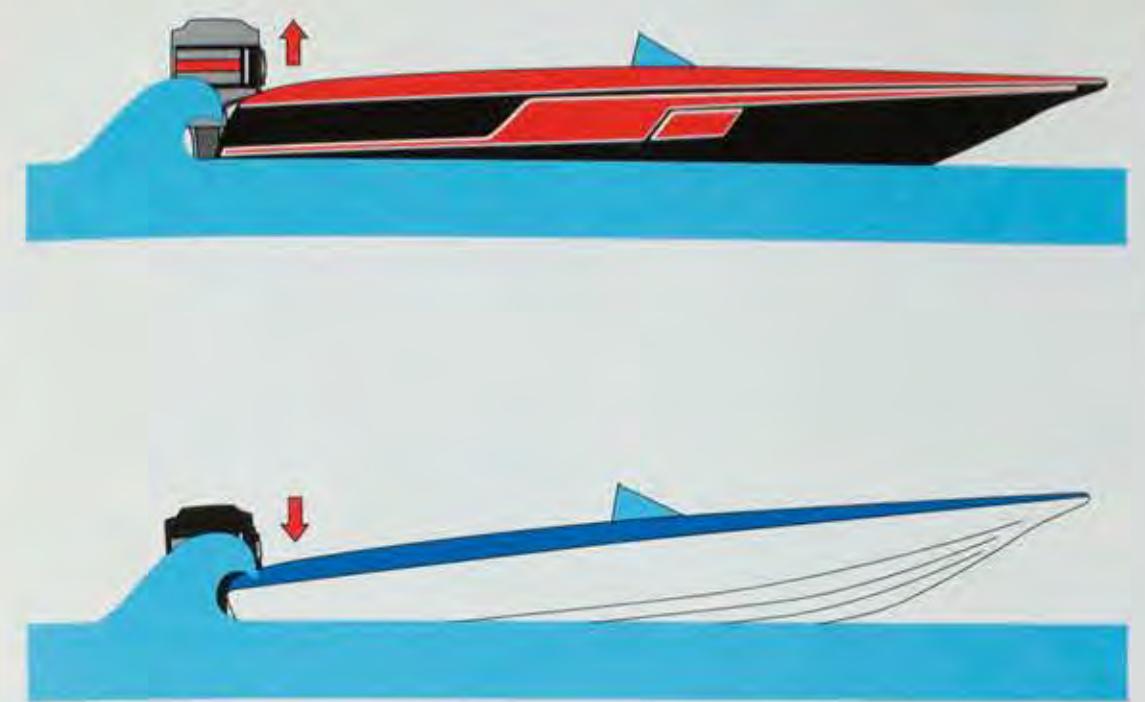

Standard on all Skeeter bass boats: deep, long, wide, carpeted rod boxes (lighted on 300ZX, 200ZX and 190ZX models), protected with corrosion-resistant, insulated Thermo-Lock™ doors.

## How to Tame 200 Wild Horses

The thrust and torque of today's high-output marine engines demand incredibly tough transoms and hulls. The rigid, high-bond, pressure-treated full-beam transoms on all Skeeter boats are strong as steel.

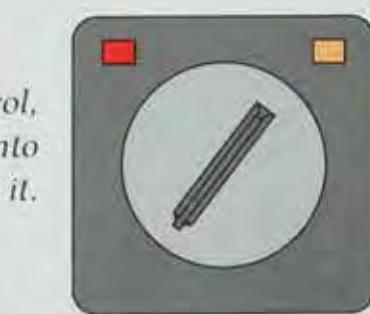

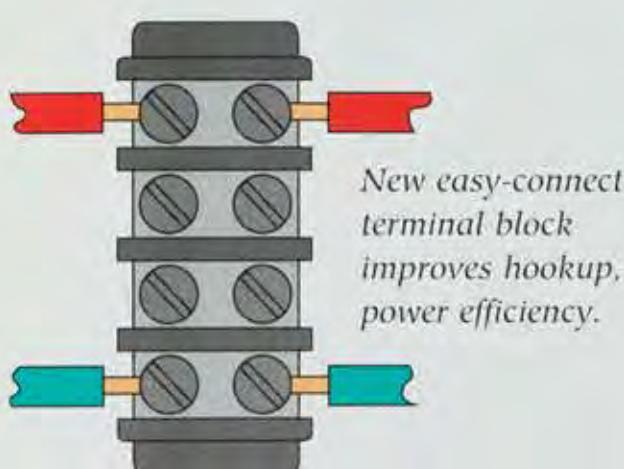

## The Hull Truth

The Skeeter reverse draft stern (top) floats the boat level in the water and deflects backwash, a problem with the design of some competing boats (lower left). In rough water, flat strakes and chines, flared sides and bow overhang channel air and spray down and around sides, allowing for a dry soft ride (lower right).

## Going with the Laminar Flow

Skeeter hulls perform with maximum efficiency whether trolling or running full out. At slower speeds (top) trolling motors operate more efficiently, thus extending battery life. The unique hull form provides for this while also maintaining an optimum shape for dynamic lift at planing speeds.

With remote drain control, you don't need to reach into the livewell to drain it.

## Reverse Draft Transom

The exclusive reverse draft transom shape creates greater buoyancy at the stern, making the boat float level. The configuration helps to eliminate backwash. It also gets boat on plane faster, lets it plane at lower speeds and keeps the front platform lower to the water—a big benefit in fishing.

# Skeeter Apparel

Proud to Own the Best.

# Colors – Customize Your Skeeter Boat.

With endless combinations at your command, you can literally customize your Skeeter inside and out from a palette of performance flake finishes for deck, hull sides and accents, and solid gelcoat colors for running surfaces. For a great looking solid gelcoat deck finish, Skeeter highly recommends Ice White for the base color, using flake, stripes and pins as accents. A choice of upholstery colors and patterns and carpeting helps you complete the custom look. Many Skeeter owners take pride in their boats, they select color schemes to harmonize with their road vehicles.

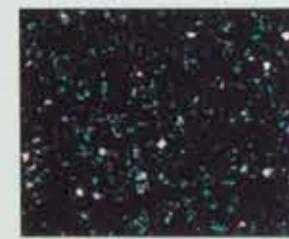

## Performance Flake Finishes

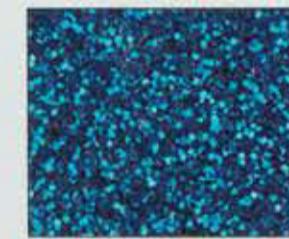

Black Galaxy
