Service MEETS EXPERIENCE

THERE'S ONLY ONE JUDGE — THE BOATER BEHIND THE WHEEL.

We're both excited and grateful that, for the eleventh consecutive year, Skeeter was recognized for excellence in Customer Satisfaction for Fiberglass Outdoor Boats. We were the **only CSI recipient** in the "Fiberglass Bass Boat" category as part of the 2012 Marine Industry CSI awards.

ELEVENTH consecutive year

IT'S A BIG DEAL

The Marine Industry CSI Program honors companies that maintain a customer satisfaction rating of 90 percent or higher. Proof that our focus stays on you.

SKEETER PRODUCTS, INC.
ONE SKEETER ROAD • KILGORE, TX 75662

SKEETERBOATS.COM

Skeeter supports our country's vast fisheries by promoting "catch and release," and is committed to preserving the environment in our manufacturing practices. At Skeeter, we continually strive to improve and enhance specifications without notice. Please confirm with your Skeeter dealer prior to purchase. Specifications and measurements are approximations and subject to variances. Some boats shown with optional equipment. Follow all instructional materials and local and federal laws. Always wear recommended protective apparel. Operate within your capabilities, allowing extra time and distance for maneuvering. Always operate in a responsible manner, respecting the environment and others around you. Don't drink alcohol or use drugs and then operate your boat. Boat smart from the start. Take

a boating safety course and get a free vessel safety check annually for your boat. For more information, contact the United States Coast Guard Auxiliary at 800-368-5647 or www.cgaux.org, or the United States Power Squadrons at 888-FOR-USPS or www.usps.org. Skeeter reserves the right to change specifications without notice. • ZX, i-Class, 22i, 21i, and 20i are registered trademarks of Skeeter Products, Inc. FX, FX21, FX20, SL, MX and WX are trademarks of Skeeter Products, Inc. This document contains many of Skeeter's valuable trademarks. It may also contain trademarks belonging to other companies. LIMITED LIFETIME WARRANTY

- Skeeter offers the original retail purchaser a Structural Warranty that covers any major structural defects in the material or workmanship, for the duration of the ownership.
- Unlike most companies, the **Structural Warranty may also be transferred to the second owner for a full 10 years from the first retail purchase date.**
- Skeeter also offers a Component Warranty to the first retail purchaser, where certain factory-installed parts are covered for up to three years from the date of purchase. The Component Warranty may not be transferred to a second owner and is subject to limitations outlined in the 2013 Skeeter Fiberglass Limited Warranty.

Number one FOR SO MANY REASONS

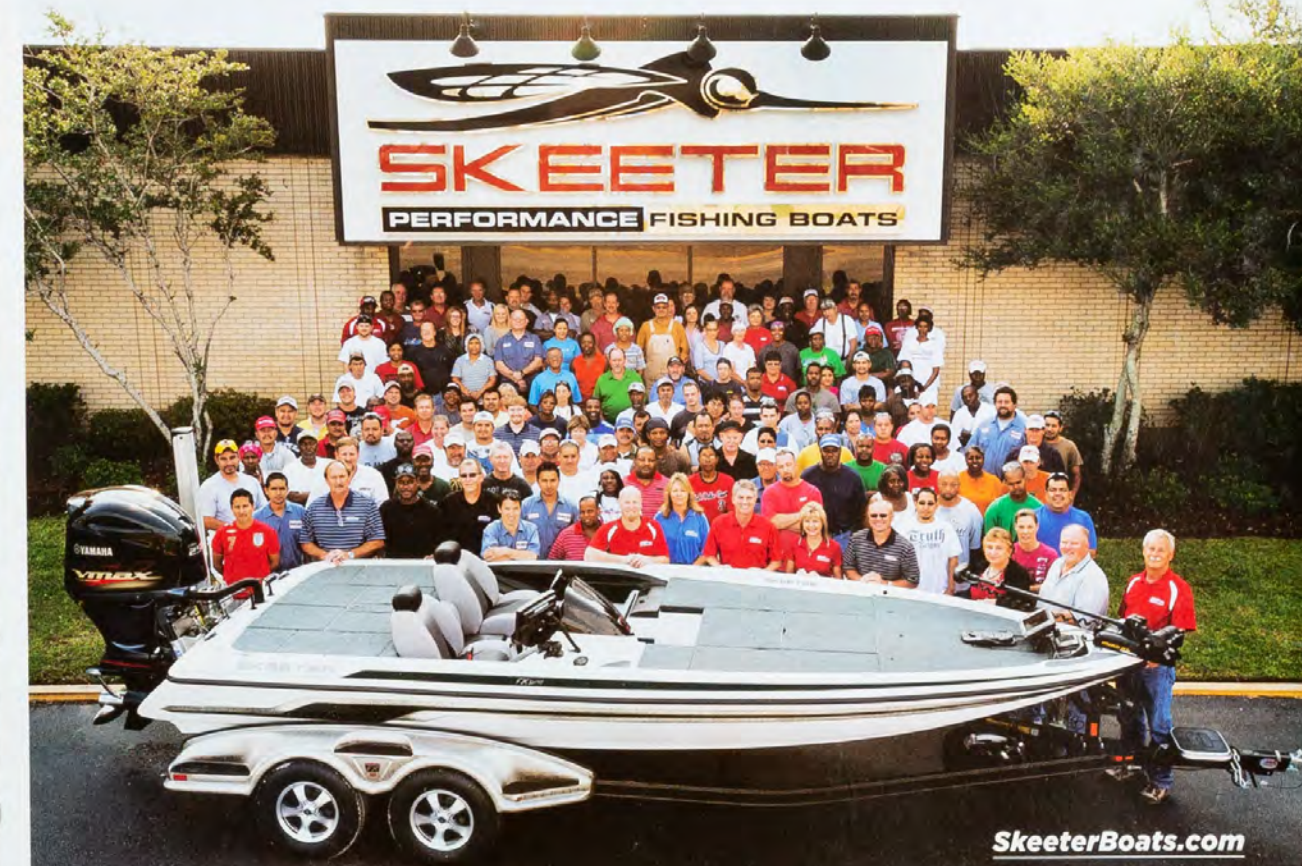

Even in a world of innovation, Skeeter stands alone. We begin with revolutionary ideas, often in response to feedback from our pros, dealers and customers. Then we subject those ideas to constant testing and rigorous manufacturing standards, so that each boat we build delivers high performance, peace of mind and outstanding resale value. Innovation — it's why every Skeeter is **Engineered Like No Other.™**

"SKEETER" WAS THE NAME ON THE FIRST:

- Bass boat
- U.S. Coast Guard approved bass boat
- V-hull pad design
- Sponson hull capability concept
- Production composite bass boat
- Aluminum deck grid system
- Completely closed transom with no splashwell
- Full-length rod box
- Bass boat rated for a 150 HP engine
- Rod Staze™ system

All Skeeter boats have been certified by the National Marine Manufacturers Association®, and meet all United States Coast Guard and American Boat & Yacht Council requirements.

SkeeterBoats.com

Dedication MEETS REWARDS

IT'S TIME TO HOOK SOME FOR YOURSELF.

Our Real Money program comes with a catch — to win prize money in our sanctioned tournaments, you must fish with a Skeeter boat. Wait a minute...that's not a catch — that's an unfair advantage! Payouts at our grassroots events grow every year, just one more reason why Skeeter is the leader in tournament fishing. Register for Real Money today.

Enter. Fish. Win.

WIN UP TO \$3,000

FOR EACH ELIGIBLE TOURNAMENT.

Win the most while fishing the best with the 2013 Skeeter Real Money Program. The payouts at grass roots events keep growing and this year's purse could be even higher. Just another reason why we're the leader in tournament fishing. Register for Real Money today. Real Money Program dates are from January 1 through December 31, 2013.

- BUY** a Skeeter boat. Purchase any new or used Skeeter boat powered by a Yamaha engine from a dealer or private party.
- REGISTER.** Visit your local, authorized Skeeter dealer to obtain a registration form, or download at skeeterboats.com. You must register each year to be eligible. If you acquire a different Skeeter boat after you are registered, please contact Skeeter to change the serial number to your registration by calling (903) 983-5657. A \$25 registration fee per angler includes a membership card, an Official Real Money hat, Real Money boat decal, Skeeter truck decal, and patch.
- FISH & WIN** in a contingency-sanctioned paying event. A list of sanctioned tournaments and payouts are posted on our Web site. A schedule of sanctioned tournament dates is compiled in late winter, and updated periodically on our Web site. Schedules are subject to change without notice.
- GET PAID.** Payments will be made once Skeeter receives and approves "official" tournament results from you and all Rules and Conditions for applicable year have been met. To be eligible for incentive, you must register prior to participating in a contingency-sanctioned paying event.

For complete details, terms and conditions, or to see the most current list and schedule of sanctioned tournaments, please see your local authorized Skeeter dealer or visit our website.

SkeeterBoats.com

THE PERFECT ASSOCIATION

BASS AND SKEETER

Skeeter is the authority on bass boats. BASS is the authority on fishing. So it's only natural that Skeeter partners with the Bass Anglers Sportsman's Society as its official boat sponsor. We're out there with you on the tournament trail, taking you to the fish and ready to hand over a nice, fat check through our Real Money program. You won't find a better fishing buddy.

BASSMASTER CLASSIC

BASSMASTER ELITE SERIES

BASSMASTER OPENS

BASSMASTER JUNIOR WORLD CHAMPIONSHIP

carhartt BASSMASTER COLLEGE SERIES

FROM GRASSROOTS TO THE PROS, SKEETER IS WITH YOU ALL THE WAY.

With over half a million members, BASS oversees the prestigious Bassmaster® Elite Series tournament trail. Skeeter also sponsors the grassroots network that sanctions more than 20,000 events nationally in conjunction with Yamaha Outboards as the presenting sponsor for the BASS Federation Nation Divisionals and the BASS Federation Nation Championship.

Control MEETS PERFORMANCE

TAKE A DEMO RIDE AND YOU'LL BELIEVE IT TOO.

When it comes to control, Skeeter has no rival. Our boats are fast but also incredibly nimble, while resisting listing, skipping or slipping as they bite into a turn. We build maximum performance into every Skeeter by adhering to NMMA®, Coast Guard and American Boat & Yacht Council standards. Whether you're hunting down fish or just having fun, when you're in a Skeeter, you're in control. Visit us at SkeeterFX.com for a complete list of official Demo Tour Events or see your local authorized Skeeter dealer.

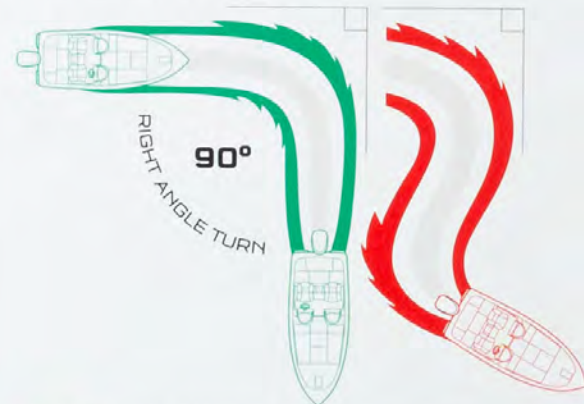

EMERGENCY TURN DEMONSTRATED BY A PROFESSIONAL DRIVER AT A DEMO RIDE AND MANEUVERABLE SPEED

ENGINEERED LIKE

Skeeter performance starts with Skeeter engineering. We've assembled a world-class team of designers who love fishing as much as physics and who live to figure out ways to make Skeeter boats faster, smoother and better than any other boat on the market. Our tradition of engineering excellence began with the world's first bass boat. We've since added innovations like the V-hull and the Skeeter Sponson. Skeeter boats are **ENGINEERED LIKE NO OTHER™**. Here are seven really good reasons why:

THE NMMA® 90° MANEUVERABILITY TEST

The test is conducted by accelerating the boat to its maximum speed, and then sharply turning the steering wheel 180 degrees with no change in settings. The boat passes the test by completing a 90° change in direction without the driver losing confidence in his ability to maintain control.

(+) PASS: DRIVER MAINTAINS CONTROL AFTER 90° TURN

(-) FAIL: DRIVER LOSES CONTROL AFTER 90° TURN

THIS CRITICAL TEST IS JUST ONE EXAMPLE OF HOW WE NOT ONLY ADHERE TO, BUT EXCEED OUR INDUSTRY'S TECHNICAL PRACTICES.

ALL SKEETER BOATS HAVE BEEN CERTIFIED by the National Marine Manufacturers Association®, and meet or exceed all United States Coast Guard and American Boat & Yacht Council requirements.

NO OTHER

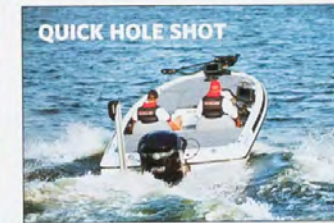

Stop! Don't worry about swamping the back of the boat. Unlike competitors, with Skeeter's revolutionary sponson hull design and water flow foil setback, you can now stop your run at full speed and forget about the following wake washing up over your deck and your enthusiasm.

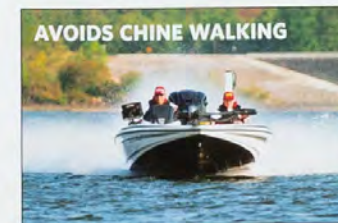

Even when your partner is jumping around in the back, it won't affect you on the bow. Skeeter's exclusive sponson and wide hull design provides extreme stability and optimum flotation reducing rocking and rolling. We even drilled holes in one of our hulls to prove it. Four men fished comfortably, and then took the same boat to plane.

Because our boats are widest in the middle, it allows the aggressive deep-V of the patented hull design to work in conjunction with the primary and secondary reverse chines to keep the water off of you and in the lake. No other boat on the water can match this comfort and control. Smooth and dry is how every ride is remembered in a Skeeter.

When you bring the hammer down, a quick view of the bow is all you get. Utilizing the patented hull design and high buoyancy coefficient, getting on plane takes a mere three to four seconds as the hull levels into a highly aggressive attitude. Without a second to lose, we put you in a better position to win.

At the extreme level of top-end performance is where Skeeter leaves the competition behind. Delivering you responsive handling in situations when most boats lose their edge, the unique engineering of the running surface, chines and exclusive Skeeter hull design keeps you on top and in control.

Take a turn for the better with less chance of hull lifting, slipping or skidding. Skeeter's exclusive turning chines and hull design gives you the ability to maintain a turn in complete control either trimmed up at full throttle or at more moderate speeds. Accurately maneuver through tight situations with confidence.

Reliability MEETS POWER

THE PERFECT POWER FOR YOUR BOAT.

With a Yamaha outboard behind you, there's nothing but good times ahead of you. Yamaha is as obsessed with reliability as you are with the water. Every last detail is engineered to give you advanced outboard technology you can count on. Every weekend. Every year.

THE YAMAHA VMAX SHO® THE FUTURE OF BASS BOAT POWER.

It's the first of its kind—a V-6 big-bore four stroke outboard for bass boats. And it's outperforming competition two strokes with:

- Up to 13% quicker hole shot
- Class-leading, 4.2 liter, big-bore displacement and power-to-weight ratio
- A design that's 34 pounds lighter than previous two stroke VMAX designs

That's just for starters. It also delivers clean-burning power and a level of fuel efficiency pro anglers never thought they'd see on the tournament circuit.

A DISTINCTIVE HARMONY WE EVEN SOUND DIFFERENT

Skeeter's patented hull design is engineered like no other and also sounds like no other. When traveling at high performance speeds on the water, the aggressive sound that is "trademark Skeeter" is caused by both aerodynamic and hydro-dynamic forces working with the complex design of the Skeeter hull combined with the power of Yamaha. No other boat has this sound because no other hull is designed like a Skeeter. You might not hear it while driving your Skeeter but your competition will as you pass them.

Experience MEETS ENGINEERING

WE STARTED BUILDING YOUR BOAT
OVER 65 YEARS AGO.

Many of our current boat-building techniques come directly from the early investments Skeeter made in aerospace engineering and technology. Our design team made us the first boat manufacturer to use space-age materials with X-Treme and EX-Cel composite construction. And aerospace principles have continued to influence our concepts, materials and manufacturing processes to this day. Maybe that's why our boats seem to fly across the water.

REVOLUTIONARY TRANSOM AND STRINGER

It's called the Aluminum Torque Transfer Transom and Stringer System. This patented revolutionary system, exclusive to Skeeter, is constructed of high-test aircraft grade structural aluminum bolted through our full width, EX-Cel composite transom. It is designed to transfer the tremendous energy and stress developed by the thrust of today's high torque outboards to the bottom structure of the hull eliminating stress on the transom and hull sides. To prove it, we're suspending this boat by its engine bolts, with no loss in hull integrity. Unlike the narrow transoms and composite materials of our competitor's transoms, this gives Skeeter boats the strongest backbone in the business. The result? Unparalleled strength that completely relieves stress on the transom, deck and sides.

PERFORMANCE HULL DESIGN

- A STRAKES:** Angled cuts along the chines provide lift and act as a rail, deflecting water as it smoothens the ride and eliminating chine walking.
- B PRIMARY REVERSE CHINES:** These concave sections deliver control and comfort, even in the roughest conditions by deflecting large volumes of water down and away from the driver and passengers.
- C SECONDARY REVERSE CHINES:** Adding another layer, the secondary reverse chines deflect any additional water passing over the running surface.
- D RUNNING SURFACE:** The aggressive area of the hull combines the center pad and the inner strakes to give Skeeter the smoothest, driest ride in the industry.
- E CENTER PAD:** The heart of the running surface where width, angle and height are precisely engineered to deliver the best combination of speed, handling and load-carrying capability.

CONSTANT CURVATURE PRINCIPLE

A distinguishing design feature of the Skeeter hull is the constant curvature of the boat from bow to stern. With the widest point just forward of the console, every Skeeter boat has a high buoyancy coefficient which prevents the bow from dropping down in large waves thus ensuring a soft, dry ride. This also allows for a larger front casting deck and oversized storage. With the deck gunwale designed to intersect the hull at three angles, increased strength and rigidity prevent damage caused by dock or timber impact.

- F TURNING CHINES:** These important performance features limit the amount of heel the boat will experience during mid-to high-speed turns to keep you in control.
- G WATER FLOW FOIL (SETBACK):** Allows water flowing under the boat to quickly rise and cover the prop while a minimal amount of hull remains in the water, reducing drag.
- H SPONSONS:** Water flowing up from the setback pushes the sponsons up and gets the boat quickly on plane. At rest, they act as pontoons that allow you to walk from side to side without rocking the boat.

- I A FINISH THAT LASTS:** Our polyflake finishes use an exclusive "dry flake" system. Spraying the flake behind the clearcoat gives a lustrous, durable finish that resists migration through the clear gel top coat. Additionally, our extra-tough Armorcoat® gel coats are considered the best in the industry against weathering and blistering.

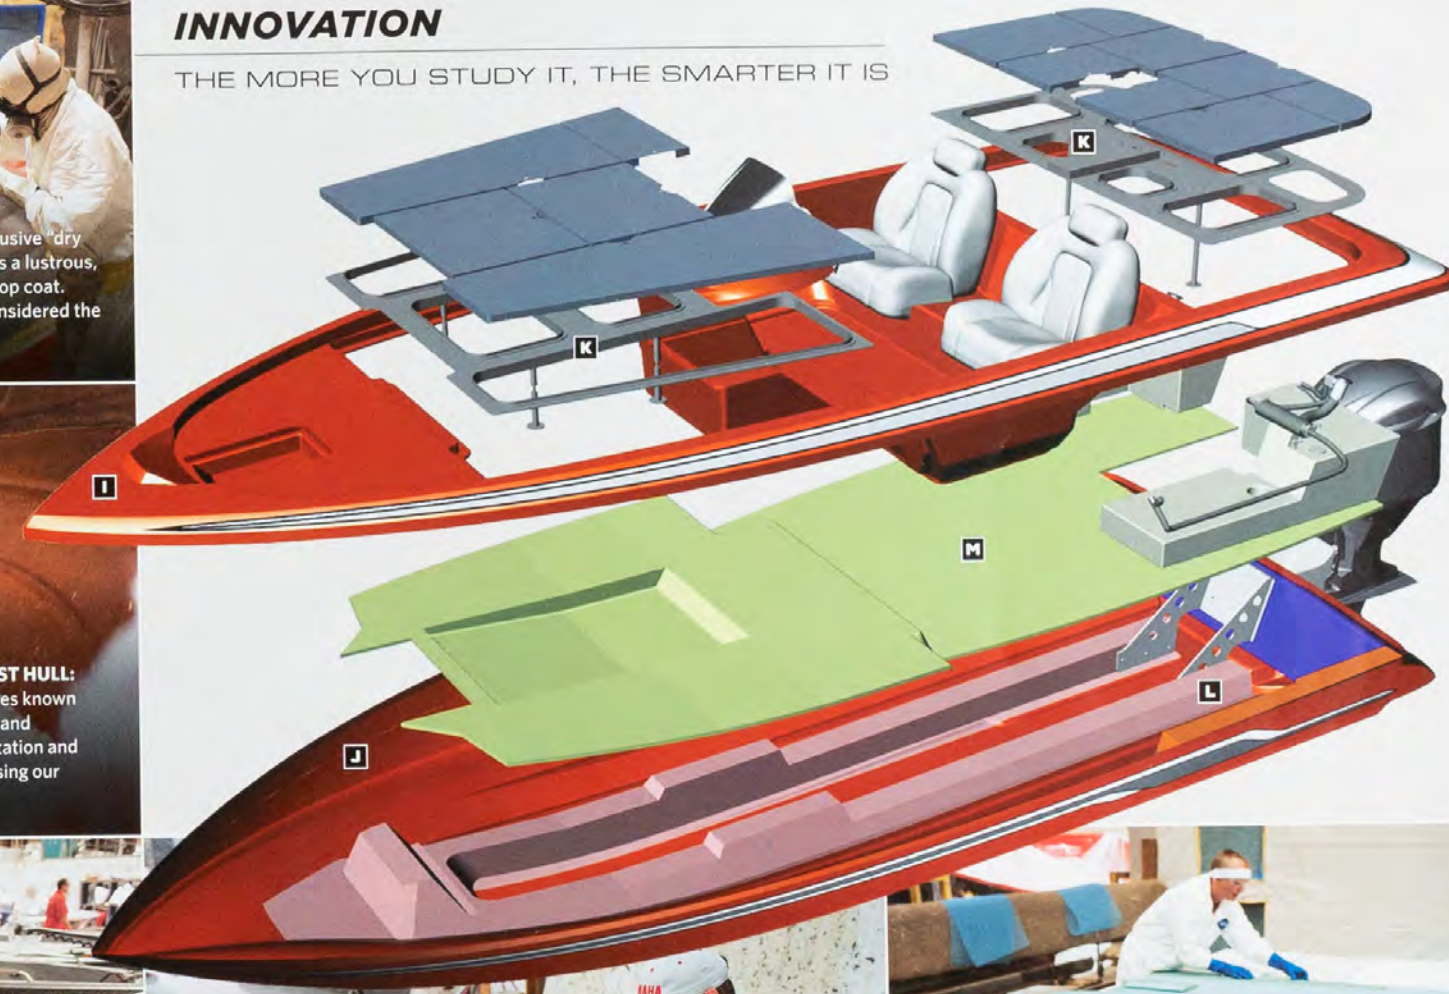

- J EX-CEL COMPOSITES, FOR THE INDUSTRY'S STRONGEST HULL:** The transom, stringers and floor utilize aerospace derivatives known as EX-Cel composites, which provide outstanding strength and durability. Unlike our competitors, we only use foam for flotation and build the strength into our extra thick hull and deck sides using our unmatched fiberglass lamination process.

- K ALUMINUM DECK GRID SYSTEM:** Aluminum structure provides superior support and strength, with lids that close tightly and lock securely. This system eliminates gel coat cracking around the storage compartments and will not flex, bend or squeak. With the adjustable jackscrew pylon, you can keep your deck and compartment lids in perfect adjustment after many years of use.

INNOVATION

THE MORE YOU STUDY IT, THE SMARTER IT IS

- L ALUMINUM TORQUE TRANSFER TRANSOM & STRINGER SYSTEM:** This patented revolutionary system, exclusive to Skeeter, is constructed of high-test aircraft grade structural aluminum bolted through our full width, EX-Cel composite transom and into our full-length hull stringers. The torque of the outboard is transferred into the bottom of the hull, which eliminates stress on the transom and hull sides.

- M COMPOSITE ONE-PIECE FLOOR:** The floor of a Skeeter is composed of a PVC crosslinked foam, sandwiched between layers of fiberglass and vacuum-infused with resin. This process provides unparalleled strength without the added weight of unwanted resin or foam.

POWER AND PERFORMANCE

are in its bloodlines.

Skeeter and Yamaha have raised one very bad boy. We designed the FX Series specifically to be paired with Yamaha's muscular VMAX SHO® engine, and it's a match made in performance heaven. Amazing hole shot. Increased top-end speed. Faster lift. Nimble handling. Plus advanced technology, generous storage and all the extras you'd expect from bass boating's best pedigree.

FX *Series*

FX21 | FX20

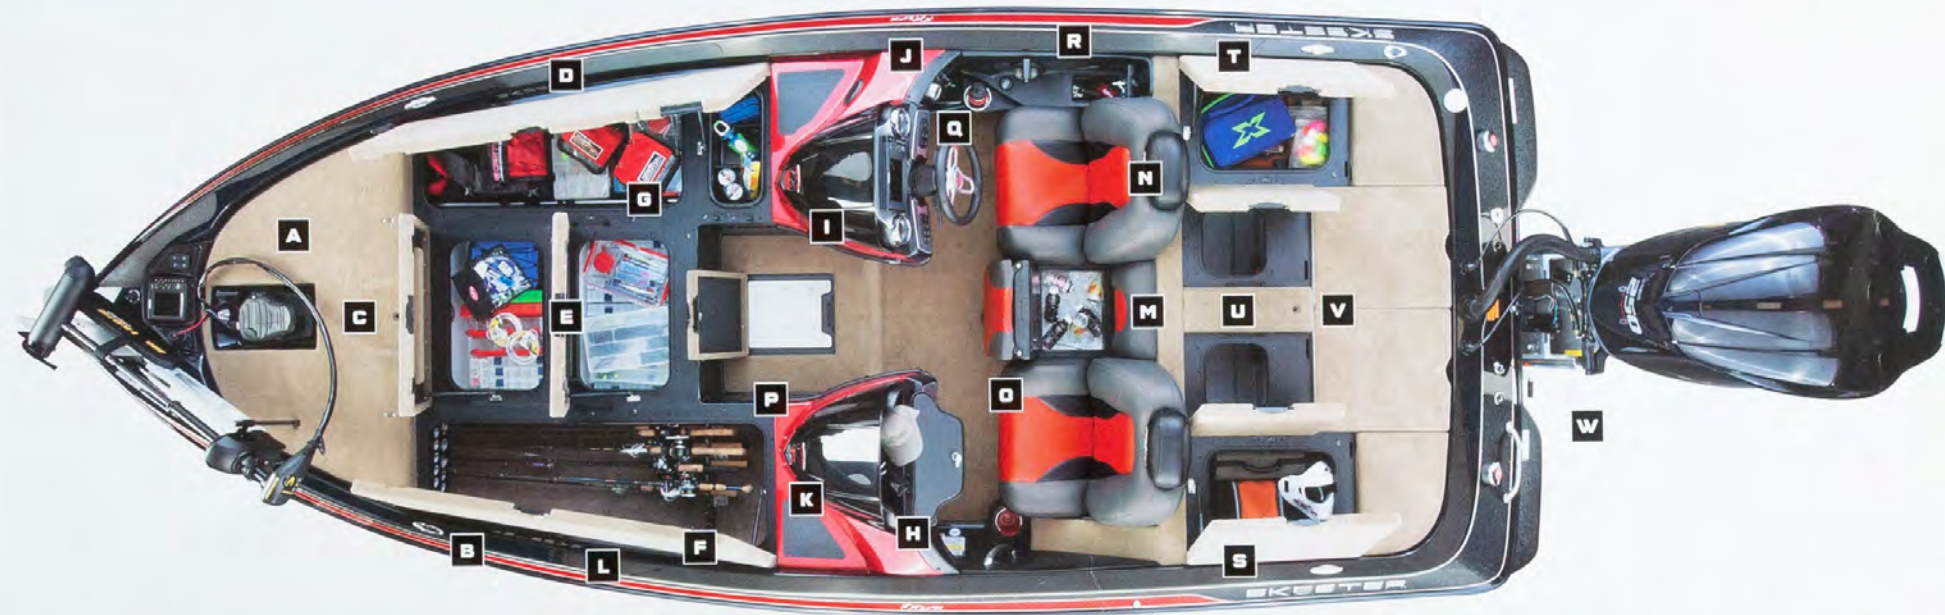

FX Series

FX21 | FX20

- A Recessed trolling motor pedal and bow control panel:** Recessed pedal keeps you comfortable by putting you in a natural standing position, keeping your foot even with the casting deck.
- B Cleats:** Stainless steel pop-up cleats snap down when not in use.
- C Pedestal bike seat:** Adjustable height pro-pole bike seat provides all day comfort with your choice of primary, secondary and accent upholstery colors and new Skeeter emblem.
- D Retractable Rod Staze™:** The next evolution. Keep your rods firmly affixed to the deck with an extra wide strap that retracts into the gunwale when released.
- E Deck tackle storage locker:** Conveniently located under the front deck, this locker provides ample storage for a dozen standard-sized utility boxes with room to spare.
- F Rod locker:** This massive storage bin comes with LED courtesy lights and a rack and tube system that keeps gear tangle free. Unlike other brands, this rod locker is wide and shallow so your rods are spread out for easy access.
- G Starboard storage locker and removable day box:** The storage locker is big enough for a spare trolling motor. We've also placed the day box just forward of the driver's console for quick access.
- H Passenger console storage:** Keep your tournament partner comfortable with his own full-sized glove box and rod rack.

- I Ergonomically designed driver's console:** Digital instrumentation from Yamaha gives you control of all onboard systems. Sealed switch panels at your fingertips and premium sealed gauges up-top give you an even better view. And the wide dash panel accommodates large-screen flush-mounted electronics directly below the windshield so you never have to take your eyes off the road.
- J DMS® (Digital Multifunctional System):** Revolutionary universal transceiver and command center permits control of all onboard systems and can "freeze" any or all settings to prevent accidental activation (or deactivation) of power, lights, electronics, bilge pumps or livewells, as well as automatically lock your storage compartments.
- K, L All weather emblems:** From the inlaid chrome-styled decals on our contoured FX windshields to the logo emblems on our deck rails, our premium graphics are designed to catch the eye and tough enough to last for years to come.
- M, N FulFlex® shock absorbing seats with suspension system:** Keeps your ride virtually vibration free, while the three-tone upholstery keeps your boat dressed for success. The innovative center seat folds down to reveal a step up, and opens up to reveal a 37-qt ice chest.
- O Passenger grab handle:** Allow your passenger to hold on tight with a sturdy hand by their side.
- P Retractable measuring board:** Pulls out easily and stores neatly by sliding flush into the side of the passenger foot rest.

- Q Hot Foot™:** Keep your hands on the wheel and control your boat's power with this secure foot throttle.
- R Driver's glove box:** Always have your lake map at your fingertips. This is the perfect storage spot for your keys and spare Skeeter cap, too.
- S, T Rear storage:** Keep equipment secure, dry, and easily accessible. Doors hinge along gunwales, or from the inside-out, so you'll still have deck space while you're in there looking.
- U Dual independent livewells:** The result of research we funded at the University of Texas, these two independent systems keep your catch calm. In it, we've replicated the natural environment of bass. Available with an optional The Oxygenator™ Tournament Livewell system that adds 100% pure oxygen to the water.
- V Fold-down pedestal fishing chair with 13" extension:** Our recently updated upholstery design brings two new features to your FX series seating. First, we've increased upholstery color choices from two to three—giving you custom comfort you can see and feel. Second, we've added premium all-weather Skeeter emblems to each seat. Like fine jewelry, it takes your boat to a whole new level of finish.
- W Aft hull design:** Due to Skeeter's unique sponson design, backwash is a thing of the past. Stop your run at full speed without worrying about water flooding up over your back deck.

FX21

SPECIFICATIONS:

Length on trailer 27'4"
Length on trailer w/ motor in
towing position and swing-away
tongue open 24'11"
Width on trailer 101"

Boat length 20'10"
Beam 95"
Engine shaft length 20"
Max. height on trailer 76"
Interior depth 21"

Draft 16"
Std. boat weight 2,175 lbs.
Max. horsepower 300

CAPACITIES:

Max. weight 1,530 lbs.
Max. persons 5/700 lbs.
Fuel capacity 50 gals.

The FX Series features a bold design with chrome-styled decals.

Keep your tournament partner comfortable with his own sturdy console grab handle and full-sized glove box.

Contoured windshields feature precision lines and inlaid chrome-styled decals.

The style and attitude is fully integrated with the YAMAHA® VMAX SHO® engine.

Unlike other brands, this massive storage bin is wide and shallow so your rods are spread out for easy access.

In this case,
LOOKS ARE NOT DECEIVING.

SkeeterFX.com

SKEETER
ENGINEERING CONCEPTS

FX Performance Hull

Skeeter was the first boat manufacturer to co-engineer a complete new design in conjunction with an engine manufacturer. The result is the industry leading FX running surface which is made up of the Airfoil Assist bow design merged with sharper strakes and chines. The new bow design creates greater lift as air travels across the surfaces.

The redesigned strakes and chines are obtained with exact tolerances that result in acute sharpness of all tooling. The result is increased speed and turning ability while on the water.

For boat colors as shown, see page 67.

FX20

SPECIFICATIONS:

Length on trailer 26'6"
Length on trailer w/ motor in
towing position and swing-away
tongue open 23'10"
Width on trailer 10'1"

Boat length 20'2"
Beam 9'5"
Engine shaft length 20"
Max. height on trailer 76"
Interior depth 21"

CAPACITIES:

Max. weight 1,530 lbs.
Max. persons 5/700 lbs.
Fuel capacity 50 gals.

Contoured windshields with precision lines and inlaid chrome-styled decals give the FX series a distinctive and immediately recognizable high performance look.

Adjustable height pro-pole bike seat provides all day comfort with your choice of primary, secondary and accent upholstery colors.

Digital instrumentation from Yamaha gives you control of all onboard systems on the sleek and flashy FX console. Hydraulic steering makes driving effortless. Flush-mounted electronics mount in your line of sight, so you never have to take your eyes off the road.

Conveniently located under the front deck, this locker provides ample storage for a dozen standard-sized utility boxes with room to spare.

FulFlex® shock absorbing seats with suspension system keep your ride virtually vibration free, while the three-tone upholstery keeps your boat dressed for success.

GETS TO THE FISH FAST.

Gets the fish in the boat even faster.

SkeeterFX.com

SKEETER® ENGINEERING CONCEPTS

FX Performance Hull

The FX aft hull design combines sharper strakes along with redesigned sponsons and water flow setback to allow for proper prop hydration, increasing the performance and handling during aggressive turning maneuvers and helping obtain maximum top end speeds.

The 1.7 cubic feet of increased sponson volume not only improves the hole shot and on the water performance, it enhances the stability of the boat while at rest, when you need it most.

For boat colors as shown, see page 67.

When it comes to performance,
**THIS BEAUTY
IS A BEAST**

There's top of the line, and then there's the tippy top. The i-Class has it all — agility, responsiveness and incredible speed, plus luxury, comfort and so much technology you'll think you're in the cockpit of a fighter jet. That's what happens when you push the envelope into a whole new zip code. In fact, there's only one thing this boat doesn't have — competition.

Engine shaft length 20"
Max. height on trailer 76"
Interior depth 21"

CAPACITIES:

Max. weight 1,484 lbs.
Max. persons 5/700 lbs.
Fuel capacity 50 gals.

Adjustable height pro-pole bike seat provides all day comfort with your choice of primary, secondary and accent upholstery colors.

Ergonomically designed driver's console pairs digital instrumentation from Yamaha with the i-Class DMS® system. DMS® can "freeze" any or all settings to prevent accidental activation and deactivation and can automatically lock your storage compartments too.

Keep your rods firmly affixed to the deck with our new extra wide Retractable Rod Staze.™ Clever spring design works like a seatbelt and retracts into the gunwale when not in use.

Conveniently located under the front deck, this locker provides ample storage for a dozen standard-sized utility boxes with room to spare.

Recently updated upholstery design allows you to choose three distinct colors for all your boat's seats giving you custom comfort you can see and feel.

From put-in to weigh-in,
THIS BOAT IS ALL IN.

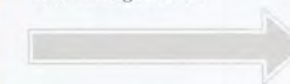

SkeeterBoats.com

SKEETER

ENGINEERING CONCEPTS

Smooth & Dry Ride

A distinguishing design feature of the Skeeter hull is the constant curvature of the boat from bow to stern. With the widest point just forward of the console, every Skeeter boat has a high buoyancy coefficient, or ratio of square footage in the bow area to total weight. Because our boats are widest in the middle, it allows the aggressive deep-V of the patented hull design to work in conjunction with the primary and secondary reverse chines which prevents the bow from dropping down in large waves.

This keeps the water off of you and in the lake thus ensuring a soft, dry ride. No other boat on the water can match this comfort and control.

For boat colors as shown, see page 67.

21i

SPECIFICATIONS:

Always keeps your refreshments within easy reach with this convenient 28 qt. floor cooler.

Have better control over your boat's power with this secure, hands-free Hot Foot™ pedal.

Allow your passenger to hold on tight with a sturdy passenger grab handle by their side.

Luxury isn't what it used to be.
IT'S BETTER!

SkeeterBoats.com

SKEETER
ENGINEERING CONCEPTS

Smooth & Dry Ride

Skeeter's unique hull design causes the water to be directed downward thus preventing the water from traveling up the hull and outward causing a wet ride. As the boat encounters a wave, the aggressive deep-V splits the wave before feeding water into the primary reverse chine.

Large waves are controlled by the large primary reverse chine and the secondary reverse chine. An exclusive Skeeter engineering design feature. The larger the wave, the larger the volume of water needed to be turned downward.

For boat colors as shown, see page 67.

Recessed pedal, flush mounted graph and bow switches make your time on the front deck comfortable and efficient.

DMS® can "freeze" any or all settings to prevent accidental activation (or deactivation) as well as automatically lock your storage compartments for added security.

Contoured windshields feature inlaid chrome-styled decals and added comfort on those cool morning runs after blast-off.

FulFlex® poured foam and shock absorbing suspension system keep your ride virtually vibration free.

Securely fasten your extra prop with the optional spare-tire style lock down. Or use it as a cooler to keep your refreshments cold.

Technically speaking:
FUN TO DRIVE

SkeeterBoats.com

SKEETER

ENGINEERING CONCEPTS

Built-in Set Back

The water flow foil or built-in set back found on Skeeter boats is largely responsible for the excellent high speed performance characteristics. Its design allows the water leaving the primary and secondary running surface to rise quickly allowing increased engine height settings.

The ability to raise the engine height reduces drag considerably and increases top end speed. The boat was designed this way to virtually eliminate any chine walking and make it much easier to handle. This concept also moves the center of gravity back giving the boat greater lift even when carrying a lot of weight during a tournament.

For boat colors as shown, see page 67.

The fastest way from **"GAME ON" TO "GAME OVER"**

Beat the competition to the fish. Heck, beat the fish there, too. The ZX series is the very definition of "tournament ready." It's got the muscle and attitude to intimidate, plus the dexterity and technology to find the fish and bring home the trophies. From out-in to weigh-in, this boat is all in. Just like you.

ZX Series

ZX21 | ZX20 | ZX200 | ZX190

ZX Series

ZX21 | ZX20 | ZX200 | ZX190

- A Recessed trolling motor pedal and bow control panel:** Recessed pedal keeps you comfortable by putting you in a natural standing position, keeping your foot even with the casting deck. Flush mounted graph looks great and maintains the smooth contour of the bow control panel.
- B, T Fold-down fishing chair and bike seat:** Redesigned three toned performance seating features a fold-down fishing chair with 13" extension and bike seat with power pro pole.
- C, D Bow storage lockers:** These two extra-large storage compartments located in the center of the front deck are perfect for utility boxes, large tackle bags or life jackets. And with our exclusive aluminum deck frame system, they'll stay strong and functional for years to come.
- E Rod locker:** This massive storage bin comes with LED courtesy lights and a rack and tube system that keeps gear tangle free. Unlike other brands, this rod locker is wide and shallow so your rods are spread out for easy access.
- F Removable day box:** We've placed it just forward of the driver's console for organization and quick access.

- G Starboard storage locker:** It's not only convenient, it's big enough for a spare trolling motor.
- H Retractable Rod Staze™ (optional):** Now your rods will stay securely strapped to the deck with these convenient straps.
- I In-floor cooler with optional prop storage:** Use it as a cooler to keep your refreshments cold or securely fasten your extra prop with the spare-tire style lock down. Available on the ZX21 and ZX20 only.
- J Passenger storage and rod rack:** Keep your tournament partner comfortable with his own full-sized glove box and rod rack.
- K Center seat cooler:** The standard center seat folds down for a step up, and lifts up to access a 37 qt. ice chest underneath.
- L Ergonomically designed driver console:** Redesigned so your graph is positioned directly in front of you, you'll never have to take your eyes off the channel. And stylish custom dash panels accommodate surface-mounting for a wide variety of units. Sealed switch panels at your fingertips and premium sealed analog gauges up-top give you an even better view, while hydraulic steering makes driving effortless.

- M Fulflex® shock absorbing seats with cooler:** The stylish three tone seating with shock absorbing suspension system keep your ride virtually vibration free. Add the optional center seat to take the entire family out for a day on the lake.
- N ZX windshield graphics:** The ZX Series comes standard with custom Skeeter windshield graphics.
- O Passenger grab handle:** Allow your passenger to hold on tight with a sturdy handle by their side.
- P Driver's glove box:** Always have your lake map at your fingertips. This is the perfect storage spot for your keys and spare Skeeter cap too.
- Q, R Rear storage:** These extra-large boxes keep equipment secure, dry, and easily accessible. Doors hinge along gunwales, or from the inside-out, so you'll still have deck space while you're in there looking.
- S Dual independent livewells:** The result of research we funded at the University of Texas, these two independent systems keep your catch calm, and pulling them out simple. In it, we've replicated the natural environment of bass. Available with an optional The Oxygenator™ Tournament Livewell System that adds 100% pure oxygen to the water.

ENGINEERING CONCEPTS

Superb Turning Ability

The top end turning ability of a Skeeter is simply the best in the industry. Our unique turning chines combined with the aft hull design, lifting strakes, exclusive set back and running surface set every Skeeter apart. The entire hull is engineered to perform as one concise feature that works together to allow the boat to turn at various speed and trim angles and stay under complete control. This is very useful in tournament conditions where maintaining high speed and superb turning is a necessity.

For boat colors as shown, see page 67.

ZX20

Recessed pedal, flush mounted graph and bow switches make your time on the front deck comfortable and efficient.

Unlike other brands, this rod locker is wide and shallow so your rods are spread out for easy access.

The stylish three-tone Fulflex® shock absorbing seating with shock absorbing suspension system keeps your ride virtually vibration free.

Redesigned so your graph is positioned directly in front of you so you'll never have to take your eyes off the channel.

Keep those fish alive and kicking with two ultimate independent livewell systems that keep your catch calm and easy to pull out.

The look has changed.
THE ATTITUDE REMAINS.

SKEETER ENGINEERING CONCEPTS

The Strength of Design

A distinguishing design feature of the Skeeter hull is the constant curvature of the boat from bow to stern. With the widest point just forward of the console, you get a larger front casting deck and oversized storage. With the deck gunwale designed to intersect the hull at an angle, increased strength and rigidity prevent damage caused by dock or timber impact.

For boat colors as shown, see page 67.

SkeeterBoats.com

SKEETER
ENGINEERING CONCEPTS

Aluminum Deck System
Aluminum structure, incorporated in the deck design of a Skeeter, provides superior support and strength, with lids that close tightly and lock securely. This system strengthens the deck and storage compartments to eliminate flexing, bending or squeaking. The aluminum grid system is another Skeeter exclusive and just one reason Skeeter is Engineered Like No Other.

For boat colors as shown, see page 67.

Underneath the plush seats there's convenient and ample storage for all your extra gear and tackle.

It's more than a boat.
IT'S A CLASSROOM.

SkeeterBoats.com

SKEETER

ENGINEERING CONCEPTS

Total Aerodynamic Design

The design curvature of both the deck and hull are very aerodynamic. These design principles, in conjunction with our exclusive deep-V hull, ensures a smooth airflow over the hull and deck preventing the boat from catching wind. This reduces the tendency for the boat to "weathervane" in a strong wind and is very easy to control with the trolling motor. This, in turn, conserves the valuable trolling motor batteries for when you need them most: that last hour of safe fishing light or right before weigh-in.

For boat colors as shown, see page 67.

SKEETER
ENGINEERING CONCEPTS

Extreme Fishability

The stern sponsons are a major design feature of the Skeeter hull. When powering onto plane, the sponsons create lift from the compressed water traveling down the running surface that quickly rises once it passes the set back area. This is known as Bernoulli's Law. The sponsons also act like pontoons that drop down into the water when the boat is at rest.

They add tremendous stability when you're moving about in the boat trying to land your largest catch of the day.

For boat colors as shown, see page 67.

Get ready for some
SERIOUS FUN.

Engineered for the **PERFECT FAMILY WEEKEND**

For your "do-it-all" family, the SL Series has the versatility to go wherever your weekend takes you. Fish on Saturday — you'll love the livewell, casting decks and optional removable trolling motor. Then take the family skiing, tubing or wakeboarding on Sunday, with all the power and performance you need for some serious fun. The possibilities are endless, and the memories will last forever.

SL *Series*

SL210 | SL190 | SL1900 | SL1800

SL Series

SL210 | SL190 | SL1900 | SL1800

- A Bow storage:** Just snap out the deck pad cushions for quick access to these sturdy hatches. Keep all your extra gear dry, secure, and convenient. The perfect place for storing life jackets, tackle boxes or skiing gear.
- B Optional Trolling Motor:** For maximum versatility, you can step up to an optional Minn Kota® Terrova® model trolling motor equipped with a removable mount. The motor's hinge housing affixes to a mounting plate on the bow. Simply disengage the secure latch and it lifts right up.
- C Fold-down fishing chair:** Enjoy all day comfort in a durable fold-down fishing chair with 13" extension or get the optional performance bike seat with power pro pole (*not shown*).
- D 180° locking swivel captain's chairs:** Comfortable, with heavyweight marine grade upholstery, these seats are built to last. Perfectly designed for spotting skiers or just lounging in the sun and visiting with family and friends.
- E Ergonomically designed driver's console:** Full instrumentation featuring accessory switch panels at your fingertips and

- premium sealed analog gauges up-top. The low-profile walk-through windshield keeps you comfortable while the tilt steering keeps you in control.
- F Bow seating:** You deserve style and comfort. Removable deck pad cushions snap in and out easily to create port and starboard padded bench seats perfect for sunbathing or just stretching out and enjoying a relaxing day on the water. Lift them off to reveal generous storage lockers.
- G Dual livewells:** Full system with fill mode and pump timer keeps fish alive while you keep fishing. *SL1900 & SL1800 livewell system may differ. See your dealer for details.*
- H Passenger console:** Features a large glove box perfect for storing an extra Skeeter cap, some sunblock and your car keys. Console also includes an AM/FM stereo with CD player and iPod® adapter and a folding cup holder at your side.
- I Rod locker:** Located in the floor, this locker is wide so your rods are spread out for easy access and holds multiple rods up to 7-feet long.

- J Ski locker:** Conveniently keeps skis, wakeboards and accessories out of the way when not in use.
- K Rear deck pads, plush seating and strut-free ski pylon:** We've turned our rear deck into a huge lounge platform with removable deck pads. Great for sunbathing—these large flat cushions offer a welcome soft spot for any skier who's been riding the waves all day. Comfortable, durable seating features marine-grade vinyl with convenient storage and ice chests underneath. Removable ski pylon is designed to give skiers the elevation they need for today's performance moves.
- L Ski rope locker:** Keep your ski rope close and easy to reach in this rear deck locker located on the back deck.
- M Boarding ladder:** Stainless steel boarding ladder ensures safe access to and from the water with slip-resistant rungs and rear deck step pad. Bottom rung folds up and snaps securely when not in use.

Features may vary according to model. See page 65 for complete details.

SKEETER

ENGINEERING CONCEPTS

Smooth & Dry Ride

Skeeter's unique hull design causes the water to be directed downward thus preventing the water from traveling up the hull and outward causing a wet ride. As the boat encounters a wave, the aggressive deep-V splits the wave before feeding water into the primary reverse chine. Large waves

are controlled by the large primary reverse chine and the secondary reverse chine. An exclusive Skeeter engineering design feature. The larger the wave, the larger the volume of water needed to be turned downward.

For boat colors as shown, see page 67.

YOUR ANSWER TO *"How was your weekend?"*

SkeeterBoats.com

SKEETER

ENGINEERING CONCEPTS

Smooth & Dry Ride

A distinguishing design feature of the Skeeter hull is the constant curvature of the boat from bow to stern. With the widest point in the center of the boat, it has a high buoyancy coefficient, or ratio of square footage in the bow area to total weight. Because our boats are widest in the middle, it allows the aggressive deep-V of the patented hull design to work in conjunction with the primary and secondary

reverse chines which prevents the bow from dropping down in large waves.

For boat colors as shown, see page 67.

STANDARDS and Options.

GET THE BOAT YOU'VE ALWAYS DREAMED OF.

You know how you want it to look, now decide how you need it to work just for you and your family. Skeeter gives you plenty of options to fit your style, whether you're fishing, skiing or taking an evening cruise. Customize your cockpit, seats, trailer and more to build your ultimate rig from stern to stern.

COCKPIT

Upgrade your windshield, steering, console and seats. Add carpet padding, deck extensions, storage and even a canopy and audio system.

ELECTRONICS

Skeeter offers a full line of electronics including Humminbird® and Lowrance®. Add depth finders, GPS and other technology options.

POWER & PERFORMANCE

Choose from a variety of trolling motors from Minn Kota® or MotorGuide®. Add a battery charger, alarm system, hydraulic jackplate, carpet padding and more.

CONSTRUCTION & SAFETY

The best-built boats on the water come with available options like a boarding ladder, custom boat and engine covers and even a livewell aeration system.

TRAILER

From a swing-away tongue, aluminum wheels and disc brakes to fender upgrades and lighting, Skeeter gives you options for premium performance and styling.

COLOR Design Guide

IT HAS A STYLE ALL YOUR OWN.

You start with the hull. Flake or gel? Should it match your truck or complement it? What about the deck? Hmm. Same as the hull or different? Bring in the stripes. What about the all new FX Bow Stripe? It would be easy to decide, if you could visualize what it would look like all put together.

Now you can! With Skeeter's interactive boat building software the only limit is your imagination. Make your selections. Print out a color mockup. Hang it up. Let your family weigh in and do it again. You get the idea. **Select "BUILD MY SKEETER" at skeeterboats.com.** It's fast and easy to create a style all your own.

TRAILERS

DURABILITY. STYLE. EASE OF HANDLING.

Our premium trailers give you the same things our boats do. We pair features like non-skid tongue steps, sealed LEDs, and independent torsion axles with thoughtful design that complements your boat and any tow vehicle.

FEATURES OUR TRAILERS NOT ONLY PROTECT YOUR BOAT, THEY LOOK GOOD DOING IT.

SWING-AWAY TONGUE
For added convenience, our swing-away tongue snaps back for tighter storage and increased safety.

TRANSOM TIE DOWNS
Load with confidence. Our heavy-duty transom tie downs feature secure ratchet straps with wrapped "s" hooks cushioned to protect your boat's finish.

LED LIGHTS
Style matches function with bright LED lights sealed to lock out the elements and protect your bulbs and wiring from exposure while underwater.

TONGUE STEP
Step up with ease thanks to our convenient non-slip tongue step for a hassle-free launch.

EURO-STEP POLYMER FENDERS
Add distinct style to your ride with fenders that complement the color of your boat.

INDEPENDENT TORSION AXLES
Each trailer wheel features a sealed, independent suspension for a smooth ride with much less maintenance than traditional leaf spring systems.

Please see standards and options table for model specifics.

WHEELS

THERE'S A CUSTOM LOOK THAT'S RIGHT FOR YOU.
Skeeter offers several wheel options, so it's easy to upgrade and create a style all your own. From sporty to sophisticated—you decide.

PROS KNOW SKEETER

CONGRATULATIONS ON ANOTHER GREAT YEAR.

OFFICIAL BOAT SPONSOR

More and more, pros with the biggest fish on their lines have the Skeeter name on their boats. We're proud of their wins, but just as proud of the way they embody the character and performance of the Skeeter brand. Continuing our commitment to competitive fishing we've signed on as the official boat sponsor of BASS® and the prestigious Bassmaster® Elite Series tournament trail.

Cliff Pace is Classic bound with 3 top ten finishes for 2012

Mark Davis secures a spot at the Classic once again

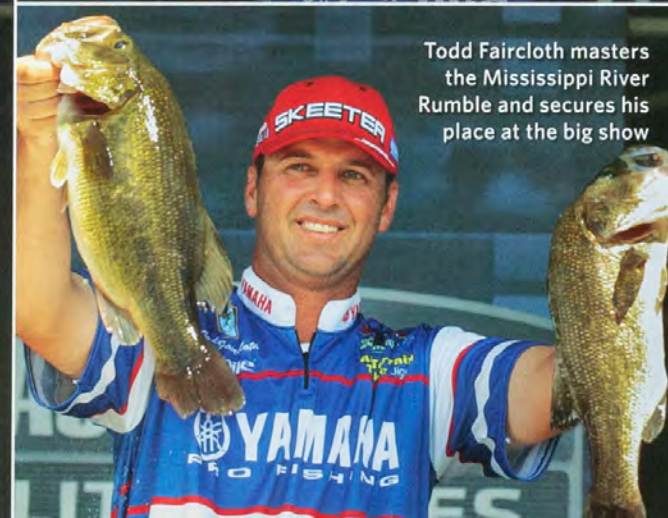

Brandon Palaniuk wins on Bull Shoals Lake and is Classic bound

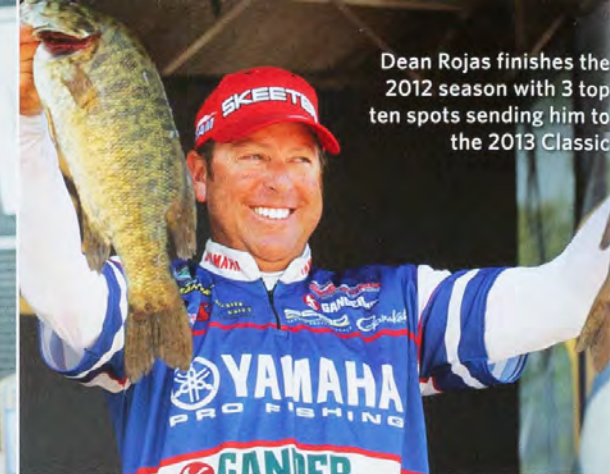

Jeremy Starks takes the Challenge on Douglas Lake

Yusuke Miyazaki clinches his way to the Classic on Lake Oneida

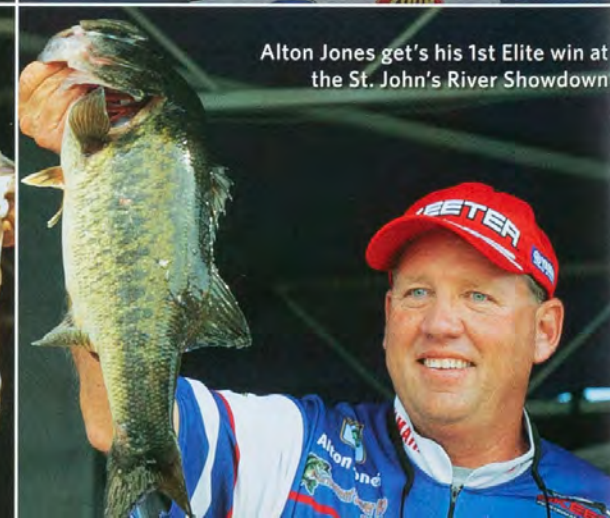

Todd Faircloth masters the Mississippi River Rumble and secures his place at the big show

Dean Rojas finishes the 2012 season with 3 top ten spots sending him to the 2013 Classic

Marty Robinson had a phenomenal year taking 3rd place on the Toledo Bend Battle

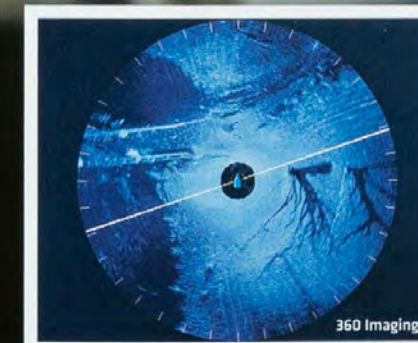

Alton Jones gets his 1st Elite win at the St. John's River Showdown

HUMMINBIRD
SIMPLY. CLEARLY. BETTER.

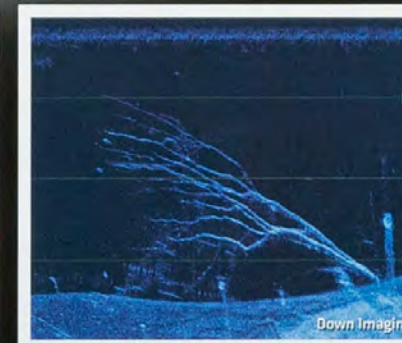

IF YOU LOOK CLOSELY, YOU CAN SEE THEIR TINY WHITE FLAGS.

WITH FOUR POWERFUL TECHNOLOGIES, FISH DON'T STAND A CHANCE.

They can swim but they can't hide—because Humminbird® sonar has every angle covered. Side Imaging® gives you a remarkably detailed, 480-foot side-to-side view. Below your boat, choose from incredible Down Imaging® and the two exclusive display modes of SwitchFire®. And now, there's no hiding from the rotating, 300-foot coverage of 360 Imaging®. With all this technology, surrender may be their best option. Find out more at humminbird.com

OWNER'S Tournament

CALL IT A FISHING FAMILY REUNION

Skeeter owners have a lot in common. They love their boats. They love to fish. And they love a good party. That's why they gather by the thousands for our Owner's Tournaments each year. There's \$250,000 in cash and prizes for 2013, demo rides, vendor displays, and lots of activities for the kids. Plus it's a great opportunity to swap fishing stories. What else would you expect when family gets together? See our website to learn more.

CONTROL

ENGINEERED LIKE NO OTHER

SUPERB TURNING

The aggressive 20-degree deep-V of the Skeeter hull design works in conjunction with the primary and secondary reverse chines to keep the water off of you and in the lake. Smooth and dry is how every ride is remembered in a Skeeter.

QUICK HOLE SHOT

When you bring the hammer down, a quick view of the bow is all you get. Getting on plane takes a mere three to four seconds as the hull levels into a highly aggressive attitude. Without a second to lose, we put you in a better position to win.

EXTREMELY STABLE

Skeeter's wide hull design provides extreme stability and optimum flotation reducing rocking and rolling often found in other multispecies boats. We even drilled holes in one of our hulls to prove it. Four men fished comfortably, and then took the same boat to plane.

Great Lakes. GREAT BOATS.

SKETER'S DEEP-V HULLS ARE BUILT TO GIVE YOU MAXIMUM CONTROL in even the harshest conditions. Whether you're running through rollers to your favorite ledge, or back trolling a snaky depth countour in a biting crosswind, our hulls are designed to be responsive and give you precise handling. Our new REACT™ keel* feature takes your precision trolling and drifting even further. It virtually locks the hull to the water and keeps you right where you want to be—on fish.

* REACT™ keel proudly featured on Skeeter's WX2190, MX2025 and MX1825 models.

SKETER IS PROUD TO BE
A YAMAHA COMPANY.

Skeeter is pleased to participate in the Discover Boating® program which helps introduce people to the boating lifestyle and to help them find the boat that is right for them. Visit DiscoverBoating.com to learn more.

A TRUE MULTI-SPECIES LINEUP

BUILT WITH YOUR STYLE OF FISHING IN MIND Skeeter is dedicated to multi-species fishermen with one of the most extensive and innovative product lines in the industry. Each one of our multi-species boats comes loaded with more than 65 years of design and technology standard.

WX ATTRIBUTES

WX2180, WX1900, WX1850, WX2000T

1. Deep V-hulls designed for big water
2. Family friendly fishing boats
3. Deeper cockpit for more secure feeling
4. cavernous storage under the front deck
5. Jump seats that fold flat to extend the rear deck
6. Aluminum torque transom with stringer system on our WX2190 flagship model

MX ATTRIBUTES:

MX2025, MX1825

1. True multispecies fishing platform
2. Lower gunwales let you fish closer to the water
3. Large rear casting deck
4. 50 inch livewell
5. Locking rod holster capable of holding 12 ft rods

THE PERFECT POWER FOR YOUR BOAT.

With a Yamaha outboard behind you, there's nothing but good times ahead of you. Yamaha is as obsessed with reliability as you are with the water. Every last detail is engineered to give you advanced outboard technology you can count on. Every weekend. Every year.

THE YAMAHA NEXT GENERATION V6 OFFSHORE FOUR STROKES

THE FUTURE OF MULTI-SPECIES POWER.

It's the first of its kind—a V-6 big-bore four stroke outboard for multi-species boats. And it's outperforming competition two strokes with:

- Up to 13% quicker hole shot
- Class-leading, 4.2 liter, big-bore displacement and power-to-weight ratio
- Next generation technology that's lighter than previous V6 two strokes and four strokes

That's just for starters.

It's also delivering clean-burning power and a level of fuel efficiency anglers never thought they'd see out on the open water.

ADVANCED ENGINEERING CONCEPTS

Revolutionary ideas. Constant testing. Rigorous manufacturing standards. Commitment to input from pros, dealers, and consumers. It all translates into peace-of-mind and stronger resale values. Enjoy your time on the water with the confidence that your Skeeter has been **Engineered Like No Other.™**

ALL SKETER BOATS HAVE BEEN CERTIFIED

by the National Marine Manufacturers Association®, and meet all United States Coast Guard and American Boat & Yacht Council requirements.

EX-CEL COMPOSITES

The transom, stringers and floor utilize aerospace derivatives known as EX-Cel composites, which provide outstanding strength and durability. Unlike our competitors, we only use closed-cell polyurethane foam for floatation and build the strength into our extra thick hull and deck sides using our unmatched fiberglass lamination process.

ALUMINUM TORQUE TRANSFER TRANSCOM & STRINGER SYSTEM

This revolutionary system bonds high-test aircraft structural aluminum to the EX-Cel transom and stringer. It is designed to transfer the tremendous energy developed by the thrust of today's high torque outboards to the bottom structure of the hull eliminating stress on the transom and hull sides. Unlike the narrow transoms and composite materials of our competitors, this gives Skeeter boats the strongest backbone in the business.

COMPOSITE STRINGERS

These longitudinal components run the length of the hull, adding strength and stability by working in conjunction with the aluminum torque transfer system to support the engine and reduce stress on the transom and hull sides. Skeeter was one of the first manufacturers to move to 100% composite stringers. There is actually no wood in our boats. Not even the deck lids. Over time, wood can shrink and expand creating gaps for moisture to settle in—loosening joints as it starts to deteriorate or rot. Ex-cel composites retain their shape and integrity and keep your boat running smooth and dry for years to come.

Tracks down big-water fish
LIKE A BLOODHOUND

Walleye, Smallmouth, Trout, Stripers. No fish is safe from our multi-species line. Fast and powerful, these boats are born for big water. And when the conditions get nasty, the rugged design stares down the elements without blinking. With a massive livewell and storage area, you can stay out as long as it takes to teach Mother Nature a good lesson.

WX2190 | WX1900 | WX1850
MX2025 | MX1825 | WX2000T

A Bow panel: Ergonomic panel features receptacle for troll motor and trim switch at your fingertips. *Switches vary per model.*

B Deck rod locker: Spacious and secure, it keeps your equipment organized in deep, lockable storage.

C Gunwale tackle storage rack: Rack storage keeps your baits quickly within easy reach on both sides of the bow on the WX2190.

D, E Port and starboard storage lockers: Deep storage allows easy access to plenty of gear and accessories.

F Bow baitwell: Aerated baitwell on the front deck keeps your bait lively and close at hand.

G Center step cooler: The standard center step folds down for a step up, and lifts up to access a 23 qt. ice chest underneath.

H Ergonomically designed driver's console with flat-top dash: Digital instrumentation from Yamaha gives you control of all onboard systems. Sealed switch panels at your fingertips and premium sealed gauges up-top give you an even better view, while hydraulic steering makes driving effortless.* The flat-top dash provides a perfect platform for mounting large profile electronics units so you can easily command GPS maps, side imaging, weather map and sonar all at the same time without shifting your line of sight.

I Passenger console with glove box: Convenient, dry storage keeps your hats, sunglasses, cell phone, sun block, camera, iPod®, wallet, and just about anything else you can imagine safe and secure. It's absolutely huge. Optional AM/FM stereo is also available.

J Cockpit seating: Designed for luxurious support and ergonomic comfort. Swiveled pedestal captains' chairs with 180° locks are easily repositioned throughout the boat with a push button release so it's easy to fish in comfort and style from the deck or the cockpit.

K, L Gunwale storage locker: Lockers along the side for that added storage you need on the water.

M Rod Holster storage locker: Tucked inside the starboard gunwale, this special locker is capable of handling one-piece trolling rods in excess of 12' and since the gunwales are wide and flat on top, it's a breeze to mount your down riggers and rodholder tracks.

N Dual console w/walk-thru windshield: Extra convenience and accessibility is standard, with the shelter and protection a big wraparound windshield offers.

O Captain's chairs: Height-adjustable with 180° locking swivels. Our recently updated upholstery design brings two new features to your Multi-Species Series seating. First, we've increased upholstery

color choices from two to three. Second, we've added premium all-weather Skeeter emblems to each seat. Like fine jewelry, it takes your boat to a whole new level of finish.

P, Q Rear deck jump seats and removable cockpit carpet: Two comfortable seats that open up to provide convenient hidden tackle rack storage and fold flat to expand the stern casting deck. Perfect for those days when you're running a full crew. Removable carpet comes out with a few snaps, so hosing down and cleaning up is easier than ever.

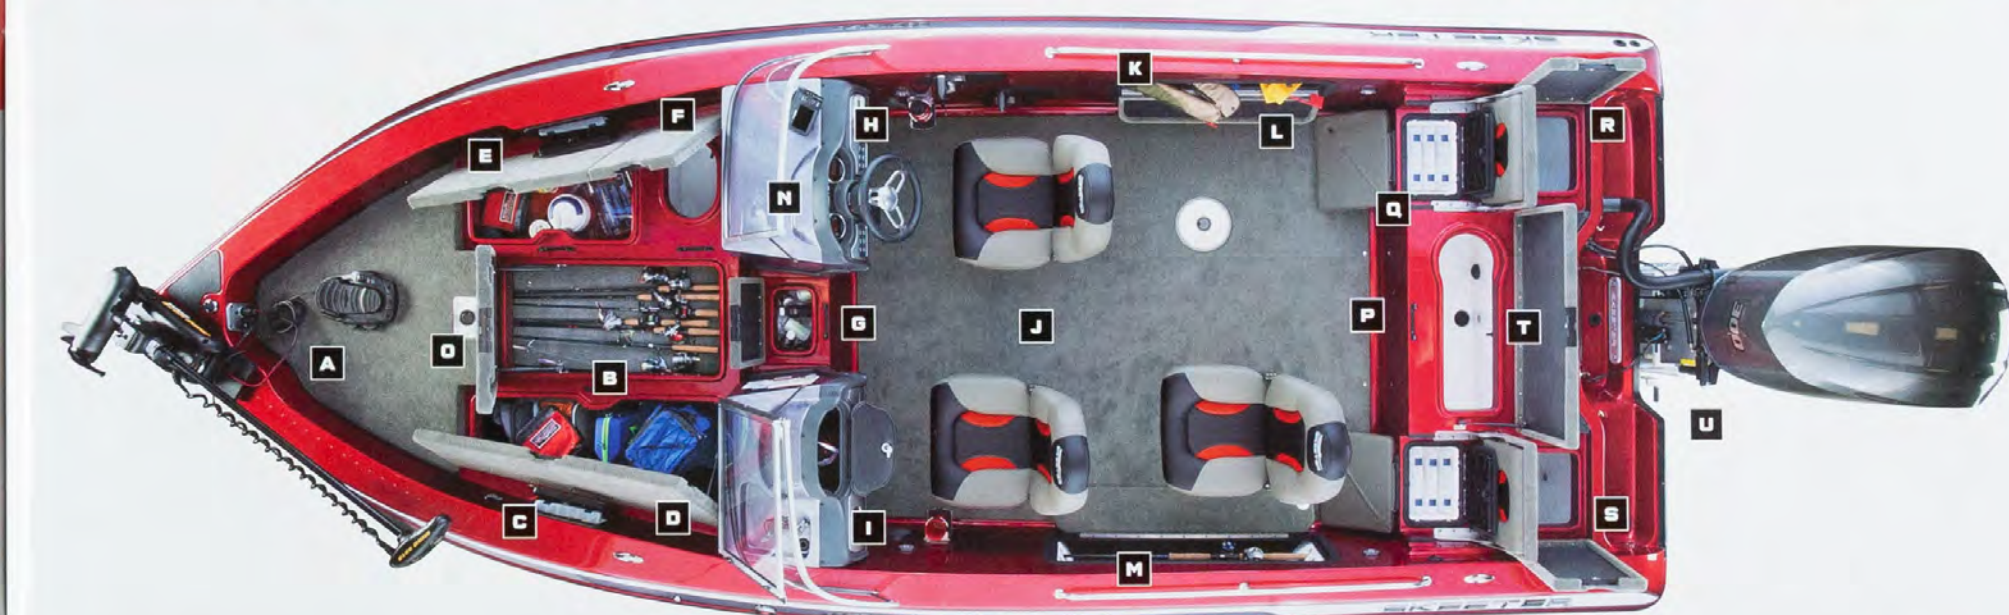

R Rear baitwell: Aerated baitwell keeps your live bait fresh and easily accessible.

S Rear Deck Ice Chest: Keeps your refreshments cold and within easy reach.

T Rear livewell: Extra large muskie-sized 50" aerated livewell with Skeeter Livewell Control System for reliable operation. Includes pump timer that allows independent fill, recirculating, and drain modes.

U E-Ladder™: Getting back in the boat is now easier than ever. Just pull the pin on this aluminum ladder and gravity sets it up. Standard on all Skeeters.

* Consoles may differ by model.

WX2190

SPECIFICATIONS:

Length on trailer w/ motor in
towing position and swing-away
tongue open 27'
Width on trailer 102"
Boat length 21'8"
Beam 18"

Engine shaft length 25"
Max. height on trailer 83"
Interior depth 25"
Draft 16"
Std. boat weight 2,775 lbs.
Max. horsepower 300

CAPACITIES:

Max. weight 1,840 lbs.
Max. persons 6/846 lbs.
Fuel capacity 51 gals.

Bring your friends and their kids. With comfortable fold-down rear deck jump seats you've got plenty of extra seating and two hidden tackle rack storage systems.

Ergonomically designed driver's console with flat-top dash offers plenty of room for mounting large profile electronics up top. Underneath, there's a handy storage shelf complete with a no-slip lip.

With the shelter and protection of a big wraparound windshield it's never too cold or too windy to run down the lake.

Passenger console features the biggest glove box you've ever seen and even sports a carpeted storage shelf underneath.

Give your fish some room to breathe with this extra large, muskie-sized 50" aerated livewell.

RUGGED.

Like the fishermen who own them.

SKEETER. ENGINEERING CONCEPTS

Aluminum Torque Transfer Transom

This patented revolutionary system, exclusive to Skeeter and standard in the all new WX2190, is constructed of high-test aircraft grade structural aluminum bolted through our full width, EX-Cel composite transom.

It is designed to transfer the tremendous energy and stress developed by the thrust of today's high torque outboards to the bottom structure of the hull eliminating stress on the transom and hull sides.

For boat colors as shown, see page 20.

WX1900

SPECIFICATIONS:

Length on trailer w/ motor in
towing position and swing-away
tongue open 21'4"
Width on trailer 10'1"
Boat length 18'9"
Beam 95"

Engine shaft length 25"
Max. height on trailer 83"

Draft 13"
Std. boat weight 2,175 lbs.
Max. horsepower 200

CAPACITIES:

Max. weight 1,550 lbs.
Max. persons 6/880 lbs.
Fuel capacity 34 gals.

Bow panel features trolling motor receptacle and trim, courtesy and anchor light switches at your fingertips.

Deep storage allows easy access to plenty of gear and accessories.

Aerated 6 gal. stern baitwell keeps your live bait fresh and easily accessible.

Gunwale storage locker along the side for that added storage you need on the water.

A locker and aerated 9 gal. baitwell keep everything you need right up front and easy to reach.

To go big, you've got to
THINK DEEP.

SkeeterMultiSpeciesBoats.com

SKEETER.
ENGINEERING CONCEPTS

Water Performance

The WX1900 hull is very unique. The full length running surface on the WX1900 provides a smooth, dry ride, yet does not compromise the midrange and top speeds that the Skeeter brand is well-known for. The design attributes of the performance hull maximizes the thrust of today's high torque outboards.

You often face rough water, and even rougher weather conditions, and this boat will get you there in comfort.

For boat colors as shown, see page 20.

WX1850

SPECIFICATIONS:

Ergonomically designed driver's console with sealed switch panels and premium sealed analog gauges up-top.

Aerated 6 gal. stern baitwell keeps your live bait fresh and easily accessible.

Use this convenient 23 qt. forward deck cooler to keep your refreshments cold and easily within reach.

Two comfortable jump seats that open up to access the rear compartments and livewell and fold flat for a large trolling deck.

Aerated 22 gal. livewell with Skeeter Livewell Control System for reliable operation.

Form-Fitting FUNCTION.

SkeeterMultiSpeciesBoats.com

SKEETER.

ENGINEERING CONCEPTS

Ultimate Fishability

Family boat — absolutely. The WX1850 does it all at a very affordable price. Two live-wells, center rod storage, and rear jump seats combined with dual fuel cells and a 150 horsepower rating make the WX1850 a great family boat, but it's also a serious fishing machine designed to handle some of the biggest lakes in North America. So chase walleye with your buddies or take it cruising and skiing or

just have fun fishing with the kids on a beautiful sunny day.

For boat colors as shown, see page 20.

MX2025

SPECIFICATIONS:		CAPACITIES:	
Overall length	20'0"	Max. weight	1,200 lbs.
Weight	1,200 lbs.	Max. persons	6/545 lbs.
Max. speed	35 mph	Max. fuel	51 gal.
Max. fuel capacity	51 gal.		

Carpeted passenger console storage shelf provides a simple and effective way to keep lots of gear organized and easily within reach.

Swiveled pedestal captains' chairs with Skeeter emblems look sharp and feel great, for a day of fishing from the deck or the cockpit.

Deck rod locker centrally located under the front deck let's you quickly grab the rod you need whether you're trolling from the cockpit or casting from the bow.

Ergonomically designed driver's console with flat-top dash features sealed switch panels and gauges and offers plenty of room for mounting large profile electronics up top.

Give your fish some room to breathe with this extra large, muskie-sized 50" aerated livewell.

POWER.
It runs in the family.

SkeeterMultiSpeciesBoats.com

SKEETER. ENGINEERING CONCEPTS

The "React" Keel

The MX2025 was started with the fundamental concept to develop the ultimate 20' multi-species fishing boat. The result, the exclusive Revolutionary Advanced Control Turning (REACT) Keel adds that extra level of control so the driver spends less time fighting the boat and more time fighting the fish. The REACT Keel was

designed with an accentuated keel and sharp reverse chines to ensure the boat tracked well when trolling forward and back and resists being pushed off course by a cross wind. It's simply unmatched maximum control.

For boat colors as shown, see page 20.

MX1825

SPECIFICATIONS:

Fuel capacity33 gals.

Aerated 9 gal. bow baitwell keeps everything you need right up front and easy to reach.

Spacious and secure, this rod locker keeps your equipment organized so your rods are tangle free and spread out for easy access.

Perfect for long one-piece trolling rods, this unique rod holster storage locker keeps your gear protected.

This massive 32 gal. baitwell/livewell system keeps fish alive while you keep fishing and bait at hand when it's time to reset.

These large boxes keep equipment secure, dry, and easily accessible while you're trolling from the back deck.

HERE'S YOUR ANSWER TO *"How did it do that?"*

SKEETER ENGINEERING CONCEPTS

Rod Holster Storage Locker

Eliminate the risk of breaking your favorite trolling rods. Tucked inside the starboard gunwale, this special locker is capable of handling one-piece trolling rods in excess of 12'. Simply tuck them in, shut the door and you're ready to run. It's never been easier to safely transport your gear.

For boat colors as shown, see page 20.

A Hardcore Boat *for hardcore anglers.*

SKEETER ENGINEERING CONCEPTS

Smooth & Dry Ride

Very serious walleye anglers know it is best to 'back troll'. Ease of boat control, low profile for the least possible wind resistance, and the tactical fishing lay-out makes the WX2000T 'custom made' just for you. As for handling the waves, the aggressive

deep-V of the patented hull design works in conjunction with the chines preventing the bow from dropping down in large waves. The WX2000T is the perfect walleye attack vehicle.

For boat colors as shown, see page 20.

SkeeterMultiSpeciesBoats.com

With sealed analog gauges, water-resistant switches, day box and optional radio, you'll have all your controls within reach.

Bow storage locker with 14 gal. aerated baitwell keeps everything you need right up front.

Full 23 gal. livewell system with fill mode and pump timer keeps fish alive while you keep fishing.

Aerated 9 gal. side baitwell keeps your live bait fresh and easily accessible.

This large box keeps equipment secure, dry, and easily accessible while you're back trolling.

COLOR Design Guide

IT HAS A STYLE ALL YOUR OWN.

You start with the hull. Flake or gel? Should it match your truck or complement it? What about the deck? Hmmm. Same as the hull or different? Bring in the stripes. What about the all new WX2190 Bow Stripe? It would be easy to decide, if you could visualize what it would look like all put together.

Now you can! With Skeeter's interactive boat building software the only limit is your imagination. Make your selections. Print out a color mockup. Hang it up. Let your family weigh in and do it again. You get the idea. **Select "BUILD MY SKEETER" at skeeterboats.com.** It's fast and easy to create a style all your own.

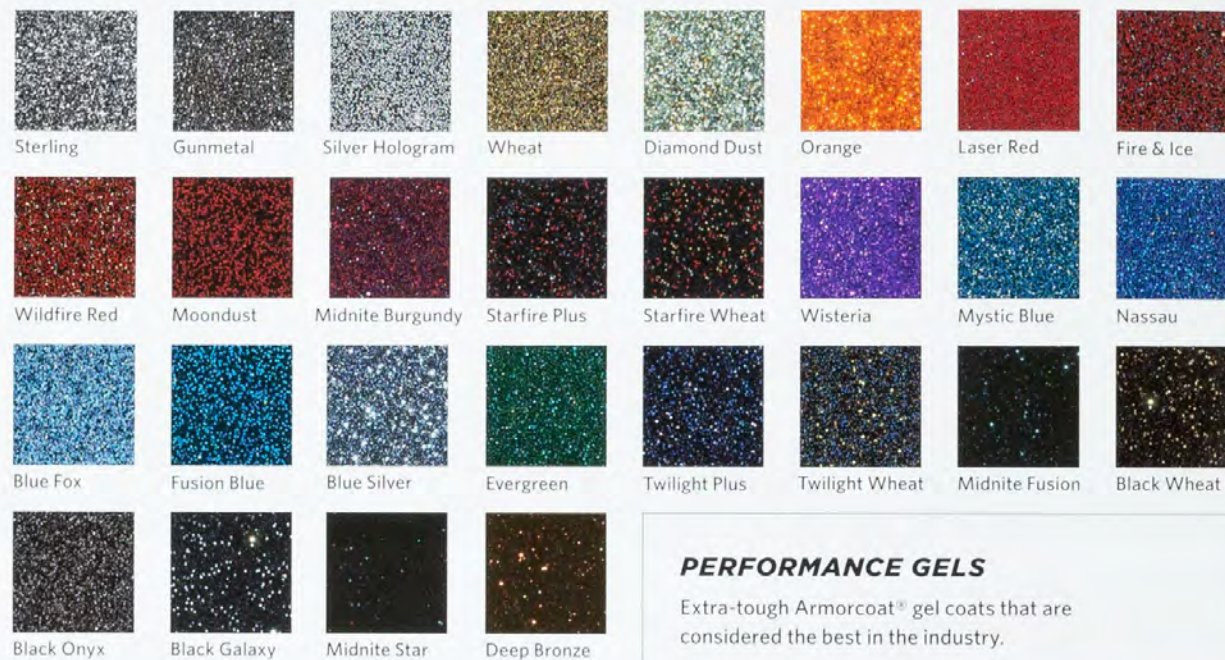

PERFORMANCE UPHOLSTERY

Heavyweight, marine-grade vinyl that's flame retardant, abrasion resistant, and UV stabilized.

PERFORMANCE FLAKES

A synthetic polyflake that resists migration through the clear gel top coat and provides a longer lasting, smooth finish.

PERFORMANCE CARPET

Durable Syntec® turf that's UV stabilized to prevent fade and degradation.

PERFORMANCE GELS

Extra-tough Armorcoat® gel coats that are considered the best in the industry.
