

BASS
2019 CATALOG

Since 1948, we've been upholding a tradition of excellence. Our innovative products introduced over the past 71 years have taken hold as industry standards. At Skeeter, our motivation to provide our customers with the best fishing experience on the water has never been higher. Our owners share a passion for their boats that connects them like a family.

Though we're proud of our records in customer satisfaction, we will never stop trying to improve on what we have accomplished. That philosophy is why we have invested time and resources into industry-driving designs like the Torque Transfer System and the React™ keel. Making a better boat is embedded in our DNA.

From our tried-and-true bass lineup, to our award winning deep-v models and newly restyled bay boats, every day our more than 300 employees demonstrate a commitment to performance and dependability. With a new plant dedicated to making SkeeterBuilt™ Trailers, we keep expanding to meet the needs of anglers.

Our lineup for 2019 continues to push the envelope with innovative new designs that offer the utmost in quality and performance. After 71 years, we believe that's what you expect from us. Whether your taste runs to the tournament trails, well-earned luxury, a day on the water skiing and fishing with your family, or a quiet morning when it's just you and the fish—Skeeter wants to provide you the ultimate experience each time you take to the water.

Sincerely,

Jeff Stone

Sr. Vice President/General Manager, Skeeter Products, Inc.

Our passion is
**BUILDING SUPERIOR
FISHING BOATS.**

Eat. Sleep. Fish.

**1948
HOLMES THURMOND**

In 1948, the first Skeeter Bass Boat, believed to be the first bass boat ever, was built by Holmes Thurmond in Shreveport, Louisiana. It was just over 13-feet long, made of molded marine plywood with a flat bottom and tumblehome side decks. Locals dubbed it the "Skeeter" because of its long, needle-shaped nose resembling a mosquito.

**1950s
FIRST TO USE FIBERGLASS IN BOATS**

The late 1950s saw the use of a new composition of materials for building boats as Skeeter became one of the first innovators to use fiberglass in its construction. Fiberglass made it possible for more sizes and styles of Skeeter boats to be quality produced in much larger numbers. Throughout the South, many are still in use today by avid Skeeter fishermen.

**1961
STEMCO MARINE**

In 1961, Ben Cook, co-founder of Stemco Corporation, acquired the patent rights of Skeeter and moved the Skeeter plant from Marshall to a bigger operation in Longview, Texas. During this period, fiberglass boats were built and stick steering was developed to control the longer 15-foot Super Skeeter and Skeeter Magnum Boats. The need for bigger boats, larger horsepower, and more control at high speeds began with a series of tri-hulls in the mid-'60s.

No other boat manufacturer boasts the rich history and heritage of Skeeter.

For almost seven decades, generations of anglers have trusted Skeeter for their best fishing memories. Our production process uses advanced manufacturing techniques and materials, many of which were first used in aerospace applications. Skeeter's X-Treme and EX-Cell composite construction ensure a smooth, dry, and safe trip to your favorite fishing hole.

**1990
FIRST DEEP-V BOAT**

Skeeter developed a line of Deep-V boats with the most popular walleye model taking triple crown at Angler of the Year in all three major walleye professional tour circuits. Today, Skeeter continues its Deep-V tradition with its WX and MX Series.

**1983
COLEMAN**

In 1983, the Coleman Company, famous for its camping equipment, purchased Skeeter, and the Fish 'n' Ski series was launched. Skeeter also introduced the first SX bass model. Despite an economic recession growing at the end of the decade, Skeeter's future remained bright with recognized hull designs that continued to lead the industry.

**1992
THE ZX SERIES
AND FIRST BAY BOAT**

In a quest for offering the ideal tournament bass boat, Skeeter unveiled the ZX Series in 1991. The innovative hull design provided a level of performance never seen before. Couple that with a super-wide casting deck, ample storage throughout, and full-length rod boxes. It is no wonder the ZX Series is our #1 selling line of boats in Skeeter history. That same year, Skeeter also launched the company's first saltwater-specific boats, the high-performance, center-console Bay Pro series. Today, Skeeter continues its Bay Boat tradition with its SX Saltwater Series.

**1975
FIRST V-BOTTOM BOAT**

Further growth in the early 1970s saw the expansion of operations to Skeeter's current plant site in Kilgore, Texas. A quantum leap in boating was made in 1975, when Skeeter developed the first V-bottom bass boat. This set a new standard in boating performance, as Skeeter was the first to introduce a 150-hp rated bass boat, which became popular on the then fledgling bass circuits. The race was on for high-speed performance, and Skeeter was clearly in the lead with its Wrangler line of boats.

1996 YAMAHA

In February of 1996, Skeeter was proud to announce that all Skeeter boats would be factory packaged with Yamaha outboards, as a result of the acquisition of Skeeter Boats by Yamaha Boat Company, a subsidiary of Yamaha Motor Corporation. It was a proud moment in Skeeter's history, and teaming up with the most technologically advanced outboard engine company in the world brought new resources and many advancements to Skeeter.

2000s TORQUE TRANSFER SYSTEM

An all new Torque Transfer Transom was introduced in boat models for 2001, which set the industry precedent in modern construction. This revolutionary system is constructed of high-test, aircraft-grade structural aluminum and is bolted through the full-width, EX-Cel composite transom. It is designed to transfer the vertical torque and energy from the engine to the stringer system in the bottom of the boat, while providing lift along the entire keel of the boat.

2010 THE FX SERIES

Breaking barriers and building the dream of a bass boat all others are measured against led to the introduction of Skeeter's FX Series. This line-up of the FX20 and FX21 redefined the standard for the tournament angler, providing a competitive edge on the water.

2019

2017 SKEETER **BUILT**TM TRAILERS

In 2017, Skeeter built a 43,000 square-foot facility in Kilgore, Texas, and began building trailers in-house. Our new Skeeter Built™ Trailers are fabricated with channel steel using a multi-step, quality-approach process and come with an exclusive limited lifetime warranty. Our digital wheel and axle alignment technology provide an added peace of mind.

2014

INTRODUCTION OF COLOR AND FEATURE PACKAGED BOATS

In 2014, Skeeter began offering high impact product packages with exclusive colors and features. These packages were aggressively priced, offering the buyer more bang for their buck with tools to maximize their fishing experience.

SKEETER **BUILT**TM

PERFORMANCE TRAILERS

As we strive for continuous improvement across the board, Skeeter is now building all of our trailers at a new 43,000 square-foot facility in Kilgore, Texas. Skeeter Built™ Trailers come with an **exclusive limited lifetime warranty**. Each trailer is fabricated and welded using a multi-step, quality-approach process, which includes washing and prepping for painting, priming, Tuff Coat application and pin striping. While your Skeeter boat provides a smooth ride on the water, our Skeeter Built™ Trailers with torsion spring axles offer a smooth ride on the road. Our brake system, composite fenders (FX Series), and Vault wheel hubs are built for function and style. Brakes on all axles provide additional safety and control when towing your boat. Our digital wheel and axle alignment technology gives you an added peace of mind. This vertical integration also gives us more flexibility, more customization, and more innovation!

LED LIGHTS

Style matches function with bright LED lights sealed to lock out the elements and protect your bulbs and wiring from exposure while underwater.

TONGUE STEP

Step up with ease thanks to our convenient non-slip tongue step for a dry launch.

INDEPENDENT TORSION AXLES

Each trailer wheel features a sealed, independent suspension for a smooth ride with much less maintenance than traditional leaf spring systems.

SWING-AWAY TONGUE

For added convenience, our swing-away tongue snaps back for tighter storage and increased safety.

DIGITAL WHEEL ALIGNMENT

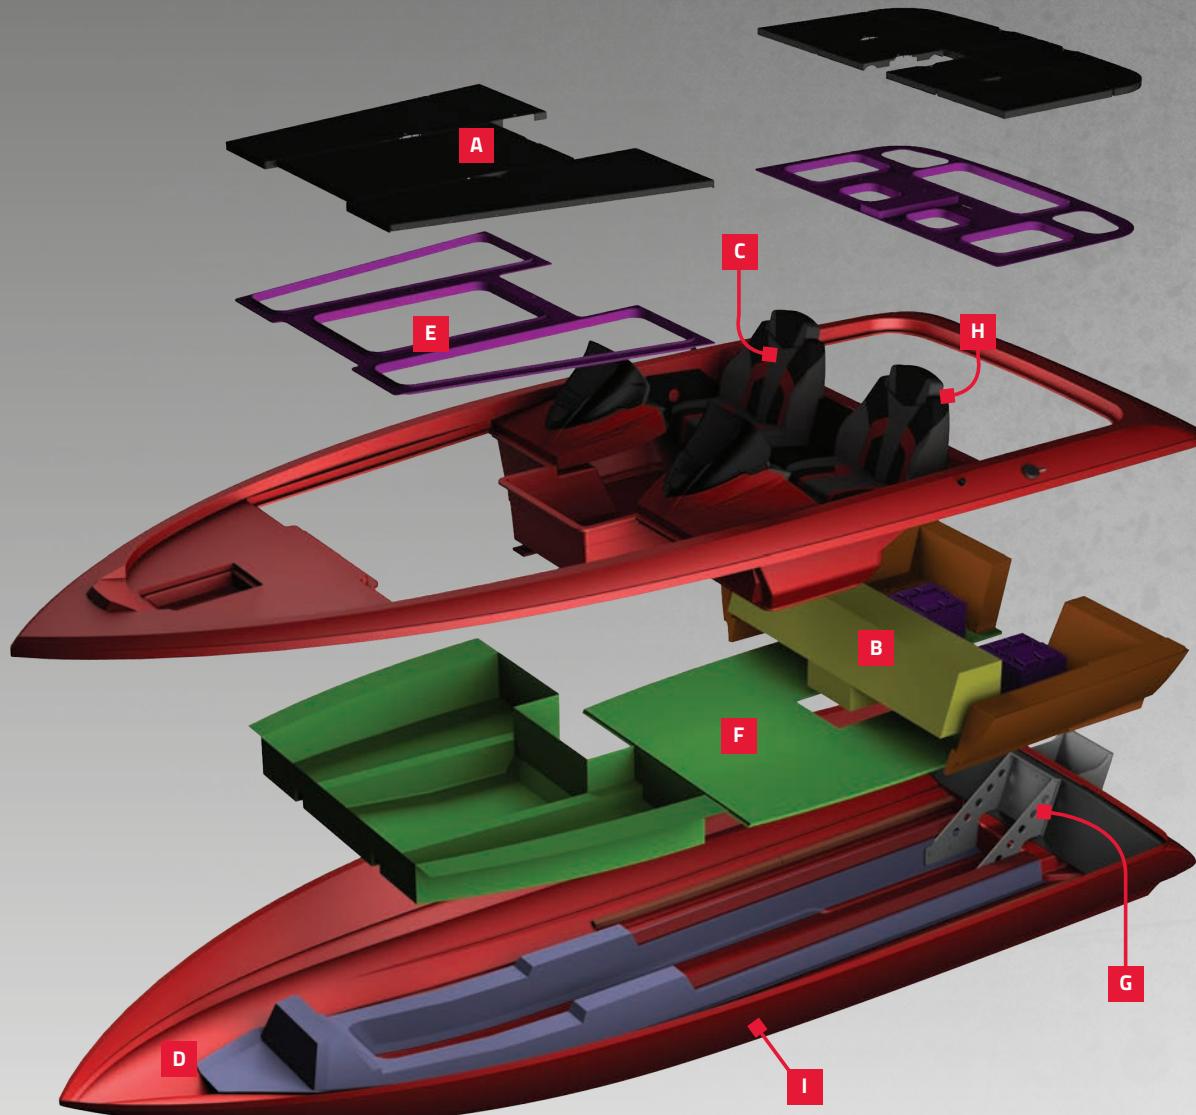

Every Skeeter Built™ Trailer is built to an exacting alignment standard to maximize tire life and towing efficiency and minimize tow vehicle tire wear and drive-line loads.

EURO-STEP COMPOSITE FENDERS

Add distinct style to your ride with fenders that complement the color of your FX and FXLE boats.

Constant
INNOVATION
 to push what's **POSSIBLE.**

A ALUMINUM DECK LIDS

There's no comparison between fiberglass and aluminum deck lids. Our aluminum lids are durable and will not crack or warp over time.

B SINGLE GAS TANK

All of our models now come with a single fuel tank mounted in the back of our boats for weight distribution and better handling on straight runs and tight turns.

C FULL FLEX BOLSTERED SEATING

Our full flex bolstered seating comes with a suspension ride for a more comfortable ride. We also offer Syntec® and Spradling® premium exterior grade leather touch marine vinyl.

D STRONG EX-CEL COMPOSITE HULLS

For some of the industry's strongest fiberglass hulls: the transom, stringers and floor utilize aerospace derivatives known as EX-Cel composites, which provide outstanding strength and durability. Unlike our competitors, we only use foam for flotation and build the strength into our extra thick hull and deck sides using our unmatched fiberglass lamination process.

E ALUMINUM DECK GRID SYSTEM

Aluminum structure provides superior support and strength, with lids that close tightly and lock securely. This system eliminates gel coat cracking around the storage compartments and will not flex, bend or squeak.

F COMPOSITE ONE-PIECE FLOOR

The floor of a Skeeter is composed of a PVC cross-linked foam, sandwiched between layers of fiberglass and vacuum-infused with resin. This process provides unparalleled strength without the added weight of unwanted resin or foam.

G TORQUE TRANSFER SYSTEM

This revolutionary system, exclusive to Skeeter, is constructed of high-test aircraft grade structural aluminum bolted through our full width, EX-Cel composite transom. It is designed to transfer the tremendous energy and stress developed by the thrust of today's high torque outboards to the bottom structure of the hull.

H DURABLE UPHOLSTERY AND STITCHING

Our premium quality upholstery vinyls offer superior abrasion resistance, UV resistance for up to 1,000 hrs, mildew resistance, are fire retardant, and can withstand cold cracking to -10°F. We also use premium quality Gore® Tenara® thread which will outlast cotton/polyester threads, is resistant to rot and decay and is guaranteed to last the lifetime of the upholstery.

I QUALITY FINISHES THAT LAST

Our poly-flake finishes are applied using an exclusive "dry flake" system. Spraying the flake behind the clear-coat gives a lustrous, durable finish that resists migration through the clear gel top coat. Additionally, our extra-tough Armorcoat® gel coats are considered the best in the industry against weathering and blistering.

Over 20 Years with **YAMAHA**

**"If you are going to make it,
make it the very best there is."**

— Genichi Kawakami, Yamaha Motor's first president.

From the beginnings of Yamaha Motor Corporation in 1953, the stage was set for success through a vision of innovation. Only a few years before that, Holmes Thurmond built the first bass boat, designed upon many of the very characteristics of today's bass boats – stability, shallow draft, room for tackle and gear and easy movement around the inside of the boat. His boat was dubbed a "Skeeter," because of its long, needle-shaped nose that resembled a mosquito. These two joined forces in 1996, when Yamaha Motor Corporation purchased Skeeter. Throughout the past 20 + years, Skeeter has introduced the next generation of bass boats, including the FX and ZX Series. These boats have also served as the platform for Yamaha's four-stroke SHO engine technology – combining a powerhouse in boating and fishing. Along the way

Yamaha motors have been keeping the Skeeter bass boat ahead of the pack with unmatched performance and reliability.

Relentlessly
ENGINEERED for
performance and **CONTROL.**

HULL DESIGN

Skeeter has forever led the way in producing the most advanced boats money can buy. Our dedication to performance has set the bar year after year. We have always sourced the best engineers, whose forward thinking designs have made us who we are today. The longest running bass boat company in the world. Period. We started it, we led it, and now we are ready to take you to a whole new level of engineering.

- A Strakes:** Angled cuts along the chines provide lift and act as a rail, deflecting water as they smooth the ride and eliminate chine walking.
- B Primary Reverse Chines:** These concave sections deliver control and comfort, even in the roughest conditions by deflecting large volumes of water down and away from the driver and passengers.
- C Secondary Reverse Chines:** Adding another layer, the secondary reverse chines deflect any additional water passing over the running surface.
- D Running Surface:** The aggressive area of the hull combines the center pad and the inner strakes to give Skeeter the smoothest, driest ride in the industry.
- E Center Pad:** The heart of the running surface where width, angle and height are precisely engineered to deliver the best combination of speed, handling and load-carrying capability.

CONSTANT CURVATURE PRINCIPLE

A distinguishing design feature of the Skeeter hull is the constant curvature of the boat from bow to stern. With the widest point just forward of the console, every Skeeter boat has a high buoyancy coefficient. This prevents the bow from dropping down in large waves thus ensuring a soft, dry ride. This also allows for a larger front casting deck and oversized storage. With the deck gunwale designed to intersect the hull at three angles, increased strength and rigidity prevent damage caused by dock or timber impact.

- F Turning Chines:** These important performance features limit the amount of heel the boat will experience during mid to high speed turns to keep you in control.
- G Water Flow Foil (Setback):** Allows water flowing under the boat to quickly rise and cover the prop while a minimal amount of hull remains in the water, reducing drag.
- H Sponsons:** Water flowing up from the setback pushes the sponsons up and gets the boat quickly on plane. At rest, they act as pontoons that allow you to walk from side to side without rocking the boat.

Uniquely **DESIGNED** for **STRENGTH AND RELIABILITY.**

Innovation drives us to build the ultimate fishing machine for you. Our world-class team of designers and engineers strive for perfection. With input from our dealers, customers and staff of professional anglers, our pursuit is on-going to maximize your fishing experience! Skeeter boats are **ENGINEERED LIKE NO OTHER™**. Here are some really good reasons why:

NO CHINE WALKING

Skeeter was the first in the industry to develop the sponson hull capability concept and the V-hull pad design. Our boats are fast and nimble, but we never sacrifice safety. Our boats are built to give you maximum control, even in the harshest conditions.

STABILITY

Whether on plane, idling or trolling along through your favorite fishing hole, our sponson and wide hull design provides the stability you expect. As a result, Skeeter has been recognized for "Excellence in Customer Satisfaction for Fiberglass Bass Boat" by CSI for the 18th consecutive time!

WIDTH MATTERS

Our patented design, featuring a Deep-V hull along with primary and secondary reverse chines, keeps your ride smooth and dry. As the widest point of the hull is its middle, we take precision handling even further, locking the hull to the water with bite.

FASTER HOLE SHOT

With over 70 years of hull design experience, Skeeter has mastered the hole shot. Our patented sponsons push the right amount of water to the prop, providing the perfect amount of lift, while reducing drag.

TESTED & APPROVED

From our lab to the plant floor, from the trailer to the water, our boats are exposed to rigorous research, development and testing. Your Skeeter boat will always meet or exceed stringent internal and industry certifications.

MANEUVERABILITY

As part of NMMA® industry standards, all Skeeter models are put through the maneuverability test. By accelerating the boat to its maximum speed, and then turning 180 degrees with no change in settings, the boat passes the test by completing a 90 degree change in direction without the driver losing confidence in his or her ability to maintain control.

Yamaha POWER

For those ready for a whole new game. For years, tournament anglers championed the two stroke, sacrificing fuel economy and power for performance. That is until Yamaha unleashed the world's first 4.2L Super High Output four stroke outboard. The four stroke V MAX SHO® offers all the advantages of a two stroke in a clean burning, fuel efficient four stroke. The Yamaha-Skeeter combination provides the level of performance that anglers have always wanted.

Lightest Weight in Class

34 pounds lighter, with no lighter equivalent-horsepower production V6 bass outboard out there, including two strokes.

Acceleration and Top Speed

Advanced sensor technology allows maximum safe ignition timing, outperforming popular two stroke models for hole shot and top speed.

Better Cooler/ Straighter Tracking

Our design provides straighter tracking, increased cooling capacity, and efficiency.

Powerful Charging

With 46 amps of total alternator power at 1,000 rpm and a full 50 amps from 2,500-6,000 rpm, V MAX SHO® outboards offer the kind of charging power needed for today's on-board electronics.

 **YAMAHA**
YAMAHA MOTOR GROUP

RECORDS are meant to be
BROKEN and we love breaking them.

Our Warranty
is Second to None

For the 18th consecutive time, Skeeter has been recognized by the National Marine Manufacturers Association® (NMMA®) CSI program for "Excellence in Customer Satisfaction for Fiberglass Boats." The Marine Industry CSI Program honors companies that maintain a customer satisfaction rating of 90 percent or higher. Proof that our focus stays on you. What does this mean to you, our customer? It's a testament of our dedication to building the best quality product while providing excellent sales and service throughout your experience as a Skeeter boat owner. Your comments and suggestions enable Skeeter to provide continuous improvements, thereby enhancing your confidence that Skeeter and its dealers will remain your fishing partner for life.

All Skeeter boats have been certified by the National Marine Manufacturers Association®, and meet all United States Coast Guard and American Boat & Yacht Council requirements.

**LIMITED
LIFETIME
WARRANTY**

- Limited Lifetime Structural Warranty
- 10 Year Limited Transferable Structural Warranty
- 3 Year Limited Component Warranty

- Skeeter offers the original retail purchaser a Structural Warranty that covers any major structural defects in the material or workmanship, for the duration of the ownership.
- Unlike most companies, **the Structural Warranty may also be transferred to the second owner for a full 10 years from the first retail purchase date.**
- Skeeter also offers a Component Warranty to the first retail purchaser, where certain factory-installed parts are covered for up to three years from the date of purchase. The Component Warranty may not be transferred to a second owner and is subject to limitations outlined in the 2019 Skeeter Fiberglass Limited Warranty.

Skeeter is proud to be a Yamaha company.

From Skeeter, our national and international dealers and distributors—

WE THANK YOU

for being a part of the Skeeter family.

THANK YOU · MERCI · DOMO ARIGATO

GRACIAS · DANKE

INTERNATIONAL APPEAL—LOCAL ROOTS

With 137 dealers in 38 states and international dealers and distributors in Canada, Japan, Mexico and South Africa, you're never far from your local Skeeter representative. Where there's water, you'll likely find Skeeter nearby.

A black and white photograph of a Skeeter FX Series bass boat moving at high speed across a body of water. The boat's wake is visible, creating a sense of motion. The boat is dark-colored with white stripes along the waterline and a light-colored deck. The Skeeter logo is visible on the bow.

WHEN IT COMES TO BASS BOATS,
THERE'S GOOD, BETTER, AND FX.

FX SERIES

Because you deserve the best there is.

Everything you've been wanting in a boat is right here. Nothing but top of the line, standard equipment, and out the door for less than you'd think. No one puts more into engineering, design, performance, or fishability than us, so no one will get more out of this boat than you.

STANDARD FEATURES

1. **Exclusive Humminbird® Helix® Electronics:** Flush-mounted Helix® 5 CHIRP GPS G2N w/ temp (Dash) and Helix® 5 CHIRP GPS G2N w/ temp (Bow)
2. **Minn Kota® 70 Edge Trolling Motor:** Recessed pedal for comfort and Minn Kota® 70 Edge trolling motor with 24V power, 42" shaft and 70 pounds of thrust.
3. **Rod Locker with Gas-Assisted Lift:** Includes integrated rod storage system to support your rods individually and keep them from getting tangled.
4. **Bow Deck Cooler:** Use this convenient 30-qt. forward deck cooler to keep your refreshments cold and easily within reach.
5. **3-Color, Full-Flex, Bolstered Seating:** Offers maximum support and premium style in rough water or extreme weather conditions.
6. **26-Gallon Livewell System:** With independent fill, recirculating/drain modes, with timer and pump out.

JACK OF ALL TRADES, AND MASTER
OF EVERY SINGLE ONE OF THEM.

SL SERIES

Be the family that fishes and skis together.

Whether you're skiing, fishing, or just tooling around on a beautiful day, you'll create memories to last a lifetime—and have a blast in the process. With the right combination of our fishing boat and fun boat, there won't be a dull moment all summer long.

BOATS SHOWN IN PHOTOGRAPHS MAY INCLUDE ADDITIONAL FEATURES NOT INCLUDED IN THE AVAILABLE LIST OF OPTIONS.

SL210

SPECIFICATIONS

| | | | | | |
|---|--------|-----------------------------|--------|------------------|------------|
| LENGTH ON TRAILER | 25' 9" | BOAT LENGTH | 20' 2" | INTERIOR DEPTH | 22" |
| LENGTH ON TRAILER W/MOTOR IN TOWING POSITION & SWING-AWAY TONGUE FOLDED | 23' 3" | BEAM | 94" | DRAFT | 15" |

FAMILY TIME'S A LOT MORE FUN IN AN SL210.

Feel like fishing? It's a fishing boat. Feel like skiing? It's a ski boat. Feel like cruising around on the water? It does that, too. Flexible doesn't even begin to describe it.

CAPACITIES

| | |
|---------------|-------------|
| MAX. WEIGHT | 1,550 LBS. |
| MAX. PERSONS | 6/8/15 LBS. |
| FUEL CAPACITY | 36 GALS. |

SL210

STANDARD FEATURES

1. **Skeeter Built™ Trailer:** Tuff coat, channel frame, steel fenders, tandem torsion axles, dual disc brakes and Fulton® jack stand and winch.
2. **Ergonomically Designed Driver's Console:** Full instrumentation featuring accessory switch panels at your fingertips and premium sealed analog gauges up-top. The low-profile walk-thru windshield keeps you comfortable while the tilt steering keeps you in control.
3. **Premium Seating:** Includes bucket seats with sliders for driver and passenger, rear bench seat (2 color seating), two fishing seats with 13" extension.
4. **Floor Storage:** Store the ski tow pylon, ski gear or 7' fishing rods.
5. **Bow Seating:** Removable deck pad cushions snap in and out easily to create bench seats perfect for sunbathing or just stretching out.

YOU REALLY CAN HAVE IT ALL.

Fish in the morning and ski in the afternoon.

The SL210 is ready for anything. When you're fishing, enjoy the front and rear pedestal fishing seats with 13" extensions, the spacious rod locker, and twin (13 gal ea.) rear livewells. You can upgrade to an optional detachable trolling motor, pedestal bike seat and removable deck extension.

When you're ready to go skiing, you've got a long ski locker, removable ski pylon, and captain's swivel chairs. For comfort and convenience you get a walk through windshield, premium quality upholstery and removable bow deck pads standard. You can also add an optional removable rear sun pad for lounging, or a canopy top – perfect for families.

UPHOLSTERY

Rough water and extreme weather conditions won't hold you back from a comfortable and smooth ride. Designed to look good and last long, Skeeter's custom seating is designed with quality upholstery vinyls sourced in the U.S.A. This material offers abrasion resistance, UV resistance for up to 1,000 hours, mildew resistance, is fire retardant and can withstand cold cracking to -10°F. Our premium quality thread is resistant to rot and decay and is guaranteed to last the lifetime of the upholstery.

COLOR DESIGN GUIDE

Whether it's the colors of your favorite college or professional sports team, the color of your pick-up truck or simply the boat bling to impress, Skeeter offers a wide range of options. Gunmetal? Got it. Laser Red? Check. How about Impulse Blue? Done. Be bold with our synthetic poly-flake that resists migration through the clear gel top coat and provides a smoother, longer lasting finish. From the hull to the deck. From the seats to the stripes. Select "Build My Skeeter" at SkeeterBoats.com and build your next bass fishing machine.

ARE YOU ON BOARD?

WIN UP TO \$3,000 IN 2019!

Join the SKEETER FAMILY.

Our Real Money program sets the industry standard as a customer loyalty program – growing each year, and paying out hundreds of thousands of dollars in cash through hundreds of sanctioned tournaments at the local and state levels. Your boat is your ticket for the opportunity to win – and win big. Register for Real Money today!

What better way to spend time on the water with family or friends, connect with other Skeeter owners in your area and have the opportunity to win up to \$3,000 fishing in a sanctioned Real Money tournament? Dozens of chances to fish local tournaments could be just a short drive away. Don't miss out! Register today. Real Money Program dates are from January 1 through December 31, 2019.

The Next Level In Customer Rewards That Really Pays

\$3,000

FISH AND WIN a Contingency Paying Event using your 2019 Skeeter Boat powered by a 225 horsepower Yamaha engine or larger and you will be eligible for \$3,000 for a win.

\$1,000

FISH AND WIN a Contingency Paying Event using your 2019 Skeeter boat powered by a 200 horsepower Yamaha engine or a 2018 Skeeter boat powered by a 225 horsepower Yamaha engine or larger and you will be eligible for \$1,000 for a win.

\$500

FISH AND WIN a Contingency Paying Event using your Skeeter boat powered by Yamaha and you will be eligible for \$500 for a win.

HOW IT WORKS

- BUY** a Skeeter boat. Purchase any new or used Skeeter boat powered by a Yamaha engine from a dealer or private party.
- REGISTER.** Visit your local, authorized Skeeter dealer to obtain a registration form, or download at SkeeterBoats.com. **You must register each year to be eligible.** If you acquire a different Skeeter boat after you are registered, please contact Skeeter to change the serial number to your registration by calling (903) 983-5657. A \$30 registration fee per angler includes a membership card, an Official Real Money hat, Real Money boat decal, Skeeter truck decal, and patch.
- FISH & WIN** in a contingency-sanctioned paying event. A list of sanctioned tournaments and payouts are posted on our website. A schedule of sanctioned tournament dates is compiled in late winter, and updated periodically on our website. Schedules are subject to change without notice. Have a tournament trail you would like sanctioned? Contact your local Authorized Skeeter Dealer.
- GET PAID.** Payments will be made once Skeeter receives and approves "official" tournament results from you and all Rules and Conditions for applicable year have been met. To be eligible for incentive, you must register prior to participating in a contingency-sanctioned paying event.

Enter. Fish. Win.

Please visit our website at SkeeterBoats.com/Real-Money to register online, view complete details, terms and conditions, or see the most current list and schedule of sanctioned tournaments.

SKEETER OWNER'S TOURNAMENT

IT'S A FISHING FAMILY REUNION. Skeeter's 26th Annual Owner's Tournament will be held on famous Lake Fork on June 6th-9th, 2019. Join thousands of Skeeter owners from across the country, including those who run deep-v boats, for fun, fishing, food and entertainment. There's something for every member of the family! With up to **\$200,000** in cash and prizes available, the 2019 reunion will be bigger and better than ever – taking it to the next level. Please visit SkeeterBoats.com for more information and a full list of terms and conditions.

You're officially invited to

Eat. Sleep. Fish.

Chance to win up to
\$200,000
in cash and prizes!

▪ BOATLOAD OF TOYS AND DRAWING

It's Christmas in June at the Skeeter Owner's Tournament! Toys are collected and donated to local children and families in need. Our goal is to load up the boat as many times as possible during the tournament. Participants will be entered into a drawing, with an additional ticket given for those who enjoy a Demo Ride.

▪ A FEAST WORTH WAITING IN LINE FOR

Immediately after the weigh in on Saturday, Skeeter Boats provides hospitality and delicious BBQ for all contestants and their families. Attendees relax with a buffet full of classic BBQ fare, including world-famous "Skeeter Beans" and smoked Brisket.

▪ GREAT SKEETER DUCK HUNT

The Great Skeeter Duck Hunt is a fun way to end the tournament weekend. Prizes are awarded to contestants who collect one of the fifty ducks distributed around the lake.

APPAREL

Tell the world you love the good life.

Our full line of Skeeter apparel, headwear and gear for men, women and children is great looking and durable, just like everything with the Skeeter name. To see our full selection shop online at SkeeterBoats.com. Got a question? Please call (989) 577-5029 or send an email to orders@skeeterapparel.com.

SKEETER PROS

Will you be the next to hoist a trophy?

Skeeter anglers of all ages are competing in bass fishing tournaments, and we are proud to partner with some of the best around. From the high school level to the pros, Skeeter is involved at all levels. Skeeter, along with Yamaha Outboards, sponsors more than 20,000 events nationally through the BASS® Nation Divisionals and the BASS® Nation Championship.

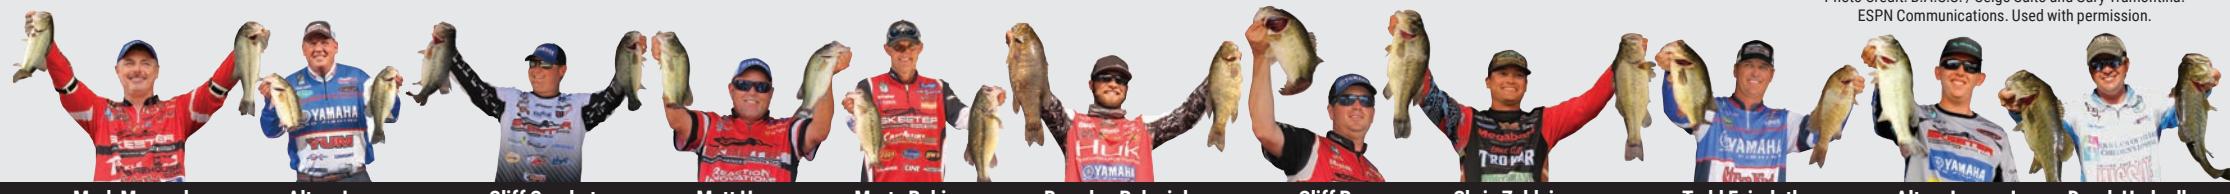

BASS® AND SKEETER

The perfect association.

Skeeter is proud of its long-standing collaboration with the Bass Anglers Sportsman's Society – both being strong stewards for bass fishing globally, and providing opportunities for novice, recreational and professional anglers to take their fishing to the next level. As the official boat sponsor of BASS®, Skeeter encourages its family to support our industry by joining BASS®. We've yet to find a better fishing buddy!
